# INDEX TO VOLUME 22

# INDEX TO VOLUME 22

## AUTHOR INDEX

In addition to the regular issues of *Cancer Research*, the following supplements were published during 1962:

Vol. 22, No. 1, Part 2, Cancer Chemotherapy Screening Data XIII, pages 1–156.
Vol. 22, No. 4, Part 2, Cancer Chemotherapy Screening Data XIV, pages 157–362.
Vol. 22, No. 5, Part 2, Cancer Chemotherapy Screening Data XV, pages 363–558.
Vol. 22, No. 7, Part 2, Cancer Chemotherapy Screening Data XVI, pages 559–748.
Vol. 22, No. 8, Part 2, Cancer Chemotherapy Screening Data XVII, pages 749–918.
Vol. 22, No. 11, Part 2, Cancer Chemotherapy Screening Data XVIII, pages 919–1148.

Each of these supplements contains its own index, and a cumulative index is found in No. 11, Part 2. The articles appearing in the 1962 supplements are listed in this index *by author only*, and such entries are indicated by "CS" preceding the number—e.g., CS 20.

**Abbott, B. J.** *See* Leiter, J., CS 609

**Abell, C. W., and Heidelberger, C.** Interaction of carcinogenic hydrocarbons with tissues. VIII. Binding of tritium-labeled hydrocarbons to the soluble proteins of mouse skin, 931

——. *See* Giovanella, B. C., 925

**Abercrombie, M., and Ambros, E. J.** The surface properties of cancer cells: *a review*, 525

**Acosta, R.** *See* Murphy, W. H., 906

**Albert, D., and Zeidman, I.** Relation of glucocorticoid activity of steroids to number of metastases, 1297

**Alexander, J. A.** *See* Wheeler, G. P., 769

——. *See* Wheeler, G. P., 1309

**Allison, J. B.** *See* Crossley, M. L., 549

**Altera, K. P.** *See* Marshak, R. R., 202

**Ambrose, E. J.** *See* Abercrombie, M., 525

**Amos, D. B.** *See* Journey, L. J., 998

**Anderson, D. G.** *See* Kirsten, W. H., 484

**Anderson, E. P., and Jacquez, J. A.** Azaserine resistance in a plasma-cell neoplasm without change in active transport of the inhibitor, 27

**Anido, P.** *See* Merker, P. C., 352

——. *See* Merker, P. C., 1163

——. *See* Merker, P. C., CS 9

**Antopol, W., and Chryssanthou, C.** Gamma globulin potentiation of Proteus lipopolysaccharide effect on Sarcoma 180, 89

**Argyris, B. F.** *See* Argyris, T. S., 73

**Argyris, T. S., and Argyris, B. F.** Differential response of skin epithelium to growth-promoting effects of subcutaneously transplanted tumor, 73

**Armaghan, V.** Effect of chemotherapy on IRC 741 leukemia in Fischer rats. I. Development of attenuated and resistant sublines, 1075

**Arrhenius, E., and Hultin, T.** Effects of carcinogenic amines on amino acid incorporation by liver systems. I. Secondary increase in microsomal activity after aminofluorene treatment, 823

**Ashford, C.** *See* Ludovici, P. P., 788

——. *See* Ludovici, P. P., 797

**Atchison, R. W.** *See* Yohn, D. S., 443

**Auricchio, F.** *See* Bresciani, F., 1284

**Baker, J. R.** *See* Homburger, F., 368

**Balls, M.** Spontaneous neoplasms in amphibia: a review and descriptions of six new cases, 1142

**Barbiroli, B.** *See* Caldarera, C. M., 1026

**Barclay, R. K., Garfinkel, E., and Phillipps, M. A.** Effects of 6-diazo-5-oxo-L-norleucine on the incorporation of precursors into nucleic acids, 809

**Barich, D.** *See* Barich, L. L., 53

**Barich, L. L., Schwarz, J., and Barich, D.** Oral griseofulvin: a cocarcinogenic agent to methylcholanthrene-induced cutaneous tumors, 53

**Baroni, C.** *See* Rappaport, H., 1067

**Bauer, J. M.** *See* Wu, C., 1239

**Baumann, M. E.** *See* Heidelberger, C., 78

**Bekesi, J. G.** *See* Macbeth, R. A. L., 244

——. *See* Macbeth, R. A. L., 1170

**Bender, M. A.** *See* Parsons, D. F., 728

**Benton, D. A.** Growth of Sarcoma 180 in adrenalectomized mice, 1220

**Berenbom, M.** Studies on the utilization of the carbon of *p*-dimethylaminoazobenzene for rat liver nucleic acid synthesis, 1343

**Bertalanffy, F. D., and Lau, C.** Rates of cell division of transplantable malignant rat tumors, 627

**Berwick, L., and Coman, D. R.** Some chemical factors in cellular adhesion and stickiness, 982

**Bhuyan, B. K., Renis, H. E., and Smith, C. G.** A collagen plate assay for cytotoxic agents. II. Biological studies, 1131

——. *See* Renis, H. E., 1126

**Biesele, J. J.** Experimental and therapeutic modification of mitosis, 779

**Blackwood, C. E., Mateyko, G. M., and Mandl, I.** Changes in proteolytic enzyme systems of rat tissues in response to heterologous growth of human ovarian tumors, 993

**Blumenthal, H. T., and Rogers, J. B.** Studies of guinea pig tumors. II. The induction of malignant tumors in guinea pigs by methylcholanthrene, 1155

**Bodansky, O.** *See* Fodor, P. J., 1230

**Boeryd, B.** *See* Mellgren, J., 139

**Bond, S.** *See* Kriss, J. P., 1257

**Boot, L. M., Mühlbock, O., Röpcke, G., and Tengbergen, W. v.E.** Further investigations on induction of mammary cancer in mice by isografts of hypophyseal tissue, 713

**Booth, B. A.** *See* Sartorelli, A. C., 94

——. *See* Sartorelli, A. C., 102

**Borman, A.** *See* Hilf, R., 449

**Bourke, A. R.** *See* Leiter, J., CS 221

——. *See* Leiter, J., CS 363

——. *See* Leiter, J., CS 609

——. *See* Leiter, J., CS 919

# SUBJECT INDEX

**AAF.** *See* 2-Acetylaminofluorene.

**Acetone,** effect on established cell lines cultivated *in vitro.* Pace and Elliott, 107

**4-Acetylaminobiphenyl,** comparative carcinogenicity of derivatives of. Miller, Fletcher, Margreth, and Miller, 1002

**2-Acetylaminofluorene,** carcinogenicities of derivatives of fluorene and biphenyl. Miller, Fletcher, Margreth, and Miller, 1002

——, effect of heated fat on carcinogenic activity of. Sugai, Witting, Tsuchiyama, and Kummerow, 510

——, *N*-hydroxylation of, in the rabbit. Irving, 867

——, urinary metabolites of, in rhesus monkey. Enomoto, Lotlikar, Miller, and Miller, 1336

**2-Acetylamino-9-(*p*-fluorophenylimino) fluorene,** little carcinogenic activity of. Miller, Fletcher, Margreth, and Miller, 1002

**2-Acetylaminonaphthalene,** urinary metabolites of, in rhesus monkey. Enomoto, Lotlikar, Miller, and Miller, 1336

***S*-Acetyl-2-fluorenethiol.** *See* 2-Acetylthiofluorene.

**N-Acetyl-neuraminic acid,** in plasma glycoproteins in human diseases. Macbeth and Bekesi, 1170

**2-Acetylthiofluorene,** little carcinogenic activity of. Miller, Fletcher, Margreth, and Miller, 1002

**Achromycin,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Acid phosphatase,** activity in hamster cheek pouch during experimental carcinogenesis. Mori, Miyaji, Murata, and Nagasuna, 1323

——, effect on cellular adhesion and stickiness. Berwick and Coman, 982

**ACTH,** added to nutrient medium, effect on human sarcomas in tissue culture. Spatz, 914

**Actidione,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

**Actinobolin sulfate,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

**Actinogan,** antitumor agent from Streptomyces, effect on Sarcoma 180 and tumor spectrum. Bradner and Sugiura, 167

——, antitumor agent from Streptomyces, properties of. Schmitz, Bradner, Gourevitch, Heinemann, Price, Lein, and Hooper, 163

——, antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Actinoleukin,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Actinomycin,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Actinomycin D,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

——, collagen plate assay for, with KB cells. Renis, Johnson, and Bhuyan, 1126

——, effect against transplants of H.Ep. #3. Merker and Hurley, 646

——, inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

——, in treatment of trophoblastic disease in women. Ross, Stolbach, and Hertz, 1015

——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

**Actinomycin F or Z,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Actinomycin $P_2$,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Adenine,** alkyl derivatives of, effects on growth of H.Ep #2 cells. Kelley, Wheeler, and Montgomery, 329

**Adenine-8-$C^{14}$,** anabolism and catabolism by minced rat tissues. Wheeler, Alexander, Dodson, Briggs, and Morris, 769

**Adenocarcinoma 755,** mitochondrial extracts of, effect of phenolic compounds on electron transport in. Dietrich, 1327

——, mouse, effect of actinogan on, *in vivo.* Bradner and Sugiura, 167

——, mouse, inflammatory response to foreign body within. Mahoney and Leighton, 334

——, purine antagonists tested against, in mice. Montgomery, Schabel, and Skipper, 504

**Adenocarcinoma E 0771,** mammary, mouse, effect of actinogan on, *in vivo.* Bradner and Sugiura, 167

**Adenomas,** pulmonary, induced by transplacental exposure to urethan, in mice. DiPaolo, 299

——, pulmonary, in mice, electron microscopy of. Svoboda, 1197

**Adenosine triphosphate,** hydrolysis of, by Ehrlich ascites tumor cells. Wallach and Ullrey, 228

**Adhesion,** cellular, chemical factors in. Berwick and Coman, 982

**Adrenal,** nucleic acids of, effect of Sarcoma 180 and stressing agents on. Hilf, Cowett, Johnson, and Borman, 449

**Adrenal cortex,** necrosis of, induced by 7,12-dimethylbenzanthracene. Wong, Warner, and Yang, 1053

**Adrenalectomy,** and growth of Sarcoma 180 in mice. Benton, 1220

**Adrenotropic activity,** of mammo-somatotropic tumors in rats and mice. Takemoto, Yokoro, Furth, and Cohen, 917

**Alazopeptin,** inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

**Albumin,** serum, catabolism of added, by mitochondrial fraction from Novikoff hepatoma. Penn, 388

——, uptake of hydroxyethylated, in rat tissues. Starbuck and Busch, 1206

**Aldolase,** activity in Sarcoma 180 in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 1230

**Algae,** nonfilamentous green, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Alkaline phosphatase,** activity in hamster cheek pouch during experimental carcinogenesis. Mori, Miyaji, Murata, and Nagasuna, 1323

——, effect on cellular adhesion and stickiness. Berwick and Coman, 982

**Alkylating agents.** *See also* specific names, such as Tetramin.

——, cytotoxic, mechanisms of action, *review.* Wheeler, 651

——, effect of Cytoxan on proteins of leukemia L1210. Strozier and Nyhan, 1332

——, effect on development of sublines of leukemia, rat. Armaghan, 1075

——, effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

**Alkyl diethylenephosphoramide,** sturcture and carcinostatic activity of. Crossley, Kuh, and Allison, 549

***N*-Alkyl-*N* nitroso compounds,** mechanism of action as cytotoxic alkylating agent, *review.* Wheeler, 651

**9-Alkylpurines,** effects on growth of H.Ep. #2 cells. Kelley, Wheeler, and Montgomery, 329

**A-melanoma 3,** hamster, electron microscopy of. Stäubli and Loustalot, 84

**Amethopterin.** *See* Methotrexate.

**Amino acid analogs,** effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

**Amino acids,** catabolism of, in rat livers, and during carcinogenesis or regeneration. Burke, 10

——, effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

——, incorporation of, effects of carcinogenic amines on microsomal activity. Arrhenius and Hultin, 823

——, ten essential, required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**4-Aminobiphenyl,** urinary metabolites of, in rhesus monkey. Enomoto, Lotlikar, Miller, and Miller, 1336

**Aminofluorene,** increase in rat liver microsomal activity after treatment with. Arrhenius and Hultin, 823

——, urinary metabolites of, in rhesus monkey. Enomoto, Lotlikar, Miller, and Miller, 1336

**2-Amino-6(1′-methyl-4′-nitro-5′-imidiazolyl)-thiopurine,** tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

**2-Aminononaphthalene,** urinary metabolites of, in rhesus monkey. Enomoto, Lotlikar, Miller, and Miller, 1336

**6-Aminonicotinamide,** tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Aminopeptidase,** activity in hamster cheek pouch during experimental carcinogenesis. Mori, Miyaji, Murata, and Nagasuna, 1323

——, increased in tumor-bearing animals. Blackwood, Mateyko, and Mandl, 993

**β-Aminoproprionitrile,** in induction of lesions of notochord in fish. Levy, 441

**Aminopterin,** tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

——, with hadacidin, effect on *E. coli.* Shigeura and Gordon, 1356

**Aminouracil mustard.** *See* 5-Bis(2-chloroethyl)aminouracil-2-$C^{14}$.

**Amphibia,** spontaneous neoplasms in. Balls, 1142

**Amphotericin B,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Animal research,** value of, *presidential address.* Dunn, 898

**Anthanthrene,** tritiated, binding to soluble proteins of mouse skin. Abell and Heidelberger, 931

——, tritiated, preparation of. Giovanella, Abell, and Heidelberger, 925

**Antibiotics.** *See also* specific antibiotics, such as Mitomycin C.

——, collagen plate assay for, with KB cells. Renis, Johnson, and Bhuyan, 1126

——, effect of mitomycin C on development of sublines of leukemia in rat. Armaghan, 1075

——, effects on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, mitomycin C-resistant Jensen rat sarcoma. Merker, Reyes, and Anido, 1163

——, required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

——, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Antibodies,** fluorescent, in cancer resarch, *review.* Glück, 895

——, to 1,2-naphthoquinone. Ollodart and Rose, 689

——, to polyoma virus, in rats given injections of virus. Kirsten, Anderson, Platz, and Crowell, 484

**Antifolic agents,** comparative effects of Ehrlich carcinoma sublines. Sartorelli and Booth, 94

**Antimetabolite.** *See also* specific names, such as Amethopterin.

——, effect of amethopterin on development of sublines of leukemia in rat. Armaghan, 1075

**Antimycin $A_3$,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Antitumor agents.** *See also* Chemotherapy.

——, actinogan, obtained from Streptomyces, properties of. Schmitz, Bradner, Gourevitch, Heinemann, Price, Lein, and Hooper, 163

——, effects on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Aralkyl diethylenephosphoramide,** structure and carcinostatic activity of. Crossley, Kuh, and Allison, 549

**Ascites hepatoma AH 13,** electron microscopy of, and resistant subline. Hirono and Kohima, 282

**Ascites tumors.** *See also* specific names, e.g., Ehrlich, Krebs.

——, oxidative phosphorylation in mitochondria of. Sauer, Martin, and Stotz, 632

——, transplantable, in mouse, host responses to. Siegler and Koprowska, 1278

——, transplantable, in mouse, mechanism of formation. Siegler and Koprowska, 1273

——, comparative electron microscopy of, and resistant sublines. Hirono and Kojima, 282

——, homografts, histiocyte response to, electron microscopy. Journey and Amos, 998

**Aspartate transcarbamylase,** in liver and hepatoma, feedback inhibition of. Bresnick, 1246

**Atomic radiation,** comments on report of United Nations Scientific Committee on effects of. Upton, 1139

**ATPase,** activity in Sarcoma 180 in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 1230

**Aureomycin,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Autoradiography,** of *in vitro* incorporation of uridine and thymidine by human tumor tissue. Wolberg and Brown, 1113

——, with thymidine-$H^3$, in regenerating rat liver. Grisham, 842

**Ayamycin $A_2$,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**8-Azaguanine,** effect on growth of H.Ep. #1 and chick embryo fibroblast cells. Rich, Perez, and Eidinoff, 3

——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, ribonucleoside and ribonucleotide of, chemotherapeutic effectiveness of. Montgomery, Schabel, and Skipper, 504

——, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

**8-Azaguanosine,** effect on growth of H.Ep. #1 and chick embryo fibroblast cells. Rich, Perez, and Eidinoff, 3

**Azaserine,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

——, enzymatic degradation of. Jacquez and Sherman, 56

——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, metabolism of 9-butyl-6-thioguanine in mouse tissues after treatment with. Kimball and LePage, 1301

——, resistance in plasma-cell neoplasm. Anderson and Jacquez, 27

——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

——, with hadacidin, effect on *E. coli*. Shigeura and Gordon, 1356

**6-Azauracil**, with hadacidin, effect on *E. coli*. Shigeura and Gordon, 1356

**Azauridine**, and decarboxylation of orotic acid-7-$C^{14}$, in effect on mouse tumor growth. Bruemmer, Holland, and Sheehe, 113

**$B^{16}$ tumor cells**, in mouse, relation of steroids to metastasis of. Albert and Zeidman, 1297

**Baboon**, benzpyrene hydroxylase activity in duodenum of. Wattenberg, Leong, and Strand, 1120

**Bashford carcinoma 63**, mouse, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

**1,2-Benzanthracene**, and benzpyrene hydroxylase activity in gastrointestinal tract. Wattenberg, Leong, and Strand, 1120

**Benzo[*a*]pyrene**. *See* 3,4-Benzpyrene.

**3,4-Benzpyrene**, tritiated, binding to soluble proteins of mouse skin. Abell and Heidelberger, 931

——, tritiated, preparation of. Giovanella, Abell, and Heidelberger, 925

**Benzpyrene hydroxylase**, activity in gastrointestinal tract. Wattenberg, Leong, and Strand, 1120

**Bile-duct epithelium**, increased in rat liver by deprivation of portal blood. Weinbren and Ghorpade, 881

**Binding**, of tritiated hydrocarbons to soluble proteins of mouse skin. Abell and Heidelberger, 931

**Biphenyl**, derivatives of, carcinogenicities of. Miller, Fletcher, Margreth, and Miller, 1002

**4-Biphenylamine**. *See* 4-Aminobiphenyl.

**2,5-Bis(acetylamino)fluorene**, comparative carcinogenicity of, in rat. Miller, Fletcher, Margreth, and Miller, 1002

**5-Bis(2-chloroethyl)aminouracil-2-$C^{14}$**, intracellular distribution in tissues of tumor-bearing rats. Byvoet and Busch, 249

**Bittner, J. J.**, *obituary*. Strong, 393

**Bladder**, urinary, induced immunity of, to bovine papillomatosis. Olson, Luedke, and Brobst, 463

**Blood**, deprivation of portal blood in rat liver, and increased bile-duct epithelium. Weinbren and Ghorpade, 881

——, of acute leukemia, chromosomal dichotomy in, in human. Sandberg, Ishihara, Crosswhite, and Hauschka, 748

**Bone marrow**, of acute leukemia, chromosomal dichotomy in, in human. Sandberg, Ishihara, Crosswhite, and Hauschka, 748

**Bovine lymphosarcoma**, clinical aspects and herd studies. Marshak, Coriell, Lawrence, Croshaw, Schryver, Altera, and Nichols, 202

**Bovine papillomatosis**, induced immunity of skin, vagina, and urinary bladder to. Olson, Luedke, and Brobst, 463

**Bromodeoxycytidine**, distribution in mouse and rat. Kriss and Révész, 254

**5-Bromo-2′-deoxycytidine**, inhibition of aspartate transcarbamylase by. Bresnick, 1246

**Bromodeoxyuridine**, distribution in mouse and rat. Kriss and Révész, 254

**5-Bromo-2′-deoxyuridine**, inhibition of aspartate transcarbamylase by. Bresnick, 1246

**5-Bromouracil**, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**5-Bromouridine**, inhibition of aspartate transcarbamylase by. Bresnick, 1246

**Bronchogenic carcinoma**, and serum globulins. Nettleship, 696

**Brown-Pearce carcinoma**, rabbit, cortisone action in increasing metastases of. Zeidman, 501

——, rabbit, *in vivo* microscopy in study of metastasis. Potter, Buttarazzi, and Cozzarelli, 1202

**9-Butyl-6-thioguanine**, metabolism in normal and neoplastic tissues, in mouse. Kimball and LePage, 1301

**6C3HED tumor**. *See* Lymphosarcoma 6C3HED Gardner.

**Cachexia**, of hepatoma-bearing animals, catalase activity in tissues. Rechcigl, Price, and Morris, 874

**Calcium**, subcellular pattern in liver carcinogenesis, in rat. Bresciani and Auricchio, 1284

**Calcium ions**, inhibit cell alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**Cancer cells**, circulating, quantitative studies in the mouse. Madden and Malmgren, 62

——, *in vitro*, *review*. Paul, 431

——, surface properties of, *review*. Abercrombie and Ambrose, 525

**Cancer research**, fluorescent antibodies in, *review*. Glück, 895

**Capromycin**, antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Carbomycin**, collagen plate assay for, with KB cells. Renis, Johnson, and Bhuyan, 1126

——, inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

**Carbon dioxide**, effect on cultivation of human neoplastic tissue. Rovin, 384

**Carcinogenesis**, by transplacental exposure to urethan, effect of oxygen concentration on, in mice. DiPaolo, 299

——, cocarcinogenic effect of oral griseofulvin to methylcholanthrene-induced cutaneous tumors in mouse. Barich, Schwarz, and Barich, 53

——, effect of hormones on methylcholanthrene-induced leukemia in mice. Liebelt and Liebelt, 1180

——, environmental, *guest editorial*. Eckardt, 395

——, hepatic, and precancerous loss of 5-hydroxytryptophan decarboxylase activity. Kizer, 196

——, induced and spontaneous cell alterations in human cell culture. Ludovici, Ashford, and Miller, 788

——, in hamster cheek pouch, changes in enzymes of glucose-6-phosphate oxidation. Scott, Morris, Reiskin, and Pakoskey, 857

——, in hamster cheek pouch, histochemical observations on enzymatic processes in experimental. Mori, Miyaji, Murata, and Nagasuna, 1323

——, in rat liver, changes in metabolism during. Burke, 10

——, kidney tumors induced in mice with 20-methylcholanthrene-impregnated strings. Stevenson and von Haam, 1177

——, malignant lymphoma induced in mice by 7,12-dimethylbenz[*a*]anthracene. Rappaport and Baroni, 1067

——, malignant tumors in guinea pig induced by methylcholanthrene. Blumenthal and Rogers, 1155

——, metal, effect of cobalt oxide and thorium dioxide, in rat and mice. Gilman and Ruckerbauer, 152

——, metal, study of cobalt, copper, iron, and nickel compounds in mice and rats. Gilman, 158

——, mitotic activity in rat liver during, by DAB. Daoust, 743

——, multipotential action of ethyl carbamate in mice. Tannenbaum and Maltoni, 1105

——, necrosis of endocrine glands induced by 7,12-dimethylbenzanthracene. Wong, Warner, and Yang, 1053

——, oncogenic properties of DNA from parotid gland tumors, in mice. Hays and Carr, 1319

——, rat liver, by azo dyes, glucokinase activity. Shatton, Donnelly, and Weinhouse, 1372

——, rat liver, subcellular distribution of metallic cations. Bresciani and Auricchio, 1284

**Carcinogenic activities**, of derivatives of dibenzanthracene. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

**Carcinogenic amines,** effects of aminofluorene on liver microsomes. Arrhenius and Hultin, 823

**Carcinogenic effects,** of cigarette smoke condensate and urethan. DiPaolo and Sheehe, 1058

——, of *N*-nitrosodialkylamines, in rat liver, effect of cysteine on. Mizrahi and Emmelot, 339

**Carcinogenic hydrocarbons,** tritiated, binding to soluble skin proteins, mouse. Abell and Heidelberger, 931

——, tritiated, preparation and purification. Giovanella, Abell, and Heidelberger, 925

**Carcinogenicity,** effect of heated fat on, of 2-acetylaminofluorene. Sugai, Witting, Tsuchiyama, and Kummerow, 510

——, multipotential, of urethan in rat. Tannenbaum, Vesselinovitch, Maltoni, and Mitchell, 1362

——, of 2-acetylaminofluorene and derivatives. Miller, Fletcher, Margreth, and Miller, 1002

——, of *N*-hydroxy-2-acetylaminofluorene and cupric chelate in rat. Miller, Enomoto, and Miller, 1381

**Carcinogens,** hepatic, biochemical effects of, *review.* Reid, 398

**Carcinoma.** *See also* Mammary carcinoma.

——, bronchogenic, and serum globulins. Nettleship, 696

——, mammary, solid, mouse, glucose, lactate, and lactic dehydrogenase activity in. Burgess and Sylvén, 581

**Carcinoma 63,** lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850

**Carcinoma 755.** *See* Adenocarcinoma 755.

**Carcinoma 1025,** lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850

——, mouse, effect of actinogan on, *in vivo.* Bradner and Sugiura, 167

**Carcinosarcoma 256 Walker.** *See* Walker 256 carcinosarcoma.

**Carcinostatic activity,** of ethylenephosphoramides. Crossley, Kuh, and Allison, 549

**Carzinophilin,** inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

**Carzinostatin,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Castration,** rats, effect on mammary cancer induction by polynuclear hydrocarbons. Dao, 973

**Catalase,** activity in tissues of hepatoma-bearing animals. Recheigl, Price, and Morris, 874

**Cathepsin B,** increased in tumor-bearing animals. Blackwood, Mateyko, and Mandl, 993

**Cattle,** induced immunity of skin, vagina, and urinary bladder to bovine papillomatosis. Olson, Luedke, and Brobst, 463

——, lymphosarcoma of, clinical aspects and herd studies. Marshak, Coriell, Lawrence, Croshaw, Schryver, Altera, and Nichols, 202

**Cell division.** *See* Mitosis.

**Cell fractionation,** and distribution of aminouracil mustard in tissues of tumor-bearing rats. Byvoet and Busch, 249

——, catabolism of serum albumin by mitochondrial fraction from Novikoff hepatoma. Penn, 388

——, distribution of metallic cations in liver carcinogenesis. Bresciani and Auricchio, 1284

——, effect of phenolic compounds on tumor mitochondrial extracts. Dietrich, 1327

——, increase in liver microsomal activity after aminofluorene treatment. Arrhenius and Hultin, 823

——, of Ehrlich ascites tumor cells, distribution of ATPase and ADPase activity in. Wallach and Ullrey, 228

——, of rat liver, and effect of cysteine on metabolic changes produced by *N*-nitrosodialkylamines. Mizrahi and Emmelot, 339

——, oxidative phosphorylation in ascites tumor mitochondria. Sauer, Martin, and Stotz, 632

——, properties of rat hepatoma mitochondria, Emmelot, 38

——, protein metabolism in rat liver fractions, effect of thioacetamide. Muramatsu and Busch, 1100

**Cell populations,** theories of changing, sensitive and resistant leukemic cells. Friedkin and Goldin, 607

**Cell proliferation,** in regenerating rat liver, DNA synthesis. Grisham, 842

**Cells,** adhesion and stickiness, chemical factors in. Berwick and Coman, 982

——, cancer, surface properties of, *review.* Abercrombie and Ambrose, 525

——, circulating cancer, quantitative studies in the mouse. Madden and Malmgren, 62

——, mammalian, isolation and long-term culture of diploid lines. Ferguson and Wansbrough, 556

**Cervical squamous carcinoma D98,** mouse, inflammatory response to foreign body within. Mahoney and Leighton, 334

**Cervix uteri,** growth potentials of precancer of, *in vitro* and in cortisone-treated hamsters. Mellgren, Boeryd, and Hagman, 139

**Chang liver cells,** modal distribution of cell variants, effects of heterologous sera. Murphy, Bullis, Landau, and Acosta, 906

**Chartreusin,** collagen plate assay for, with KB cells. Renis, Johnson, and Bhuyan, 1126

——, inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

**Chelating agent,** effect on cellular adhesion and stickiness. Berwick and Coman, 982

**Chemotherapy.** *See also* Supplements on Cancer Chemotherapy Screening Data XIII, XIV, XV, XVI, XVII, and XVIII.

——, activity of hadacidin as antitumor agent. Shigeura and Gordon, 1356

——, antibiotic effects on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

——, antitumor effect of cucurbitacins. Gallily, Shohat, Kalish, Gitter, and Lavie, 1038

——, azuridine effect on mouse ascites tumors. Bruemmer, Holland, and Sheehe, 113

——, combination, enhanced differential toxicity and collateral sensitivity, prediction of. Paigen, 1290

——, comparative studies in diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, effect of actinogan on tumor spectrum in rodents. Bradner and Sugiura, 167

——, effect of Cytoxan on proteins of L1210 leukemia. Strozier and Nyhan, 1332

——, effect of 6-diazo-5-oxo-L-norleucine on precursor incorporation into nucleic acids. Barclay, Garfinkel, and Phillipps, 809

——, effect of large doses of amethopterin in cancer patients. Condit, Shnider, and Owens, 706

——, effect on leukemia sublines in rats. Armaghan, 1075

——, experimental, in chemically induced mouse tumors. Homburger, Russfield, Baker, and Tregier, 368

——, inhibition of DNA thymine synthesis in Ehrlich ascites cells by fluorinated pyrimidines. Mukherjee and Heidelberger, 815

——, mechanisms of action of cytotoxic alkylating agents, *review.* Wheeler, 651

——, metabolism of 9-butyl-6-thioguanine in mouse tissues with and without pretreatment with azaserine. Kimball and LePage, 1301

——, of H.Ep. #3 in newborn Swiss mice. Merker, Bowie, and Anido, 352

——, of leukemia L1210 with Cytoxan subcutaneously and intracerebrally. Chirigos, Humphreys, and Goldin, 187

——, of tumor-bearing hamsters, with cyclophosphamide *in vivo.* Wheeler, Alexander, Dodson, and Briggs, 1309

——, related to autoradiography of uridine and thymidine incorporation by human tumor tissue. Wolberg and Brown, 1113

——, resistance against 5-fluorouracil in Ehrlich ascites cells. Sköld, Magnusson, and Révész, 1226

——, ribonucleosides and ribonucleotides of purine antagonists. Montgomery, Schabel, and Skipper, 504

——, structure and activity of ethylenephosphoramides. Crossley, Kuh, and Allison, 549

——, treatment of transplanted choriocarcinoma with methotrexate. Pierce, Midgley, and Verney, 563

**Chick embryo cells,** and Rous virus. Hampton and Eidinoff, 1061

——, fibroblasts, effects of purine analogs on growth of. Rich, Perez, and Eidinoff, 3

**Chikungunya,** new virus in tumor-bearing mice. Krulwich, Jacobs, Weisman, and Southam, 322

***Chlorella vulgaris,*** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Chloroleukemia,** spontaneous transplantable, in Wistar rat. Schreiner and Will, 757

**Chloromycetin,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**6-Chloropurine,** alkyl derivatives of, effects on growth of H.Ep. #2 cells. Kelley, Wheeler, and Montgomery, 329

**Choriocarcinoma,** heterotransplanted, therapy of. Pierce, Midgley, and Verney, 563

**Chromatography,** of nuclear proteins of Walker 256 carcinosarcoma. Busch, Hnilica, Chien, Davis, and Taylor, 637

**Chromomycin $A_3$,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Chromosomes,** constitution, and amethopterin resistance in cultured mouse cells. Hakala and Ishihara, 987

——, constitution, of cells from human tumors, *in vitro.* Ishihara, Moore, and Sandberg, 375

——, dichotomy of, in blood and marrow of acute leukemia. Sandberg, Ishihara, Crosswhite, and Hauschka, 748

——, number of, of cultures of white spruce tissue. de Torok and Roderick, 174

——, of diploid mammalian cell lines. Ferguson and Wansbrough, 556

——, of HeLa cells, synthesis of DNA in. Stubblefield and Mueller, 1091

**Cigarette smoke condensate,** and urethan, carcinogenic effect of. DiPaolo and Sheehe, 1058

**Cobalt compounds,** carcinogenicity in rats and mice. Gilman, 158

**Cobalt oxide,** as carcinogen in rats and mice. Gilman and Ruckerbauer, 152

**Cocarcinogenic agent,** oral griseofulvin effect on methylcholanthrene-induced cutaneous mouse tumors. Barich, Schwarz, and Barich, 53

**Coenzymes,** folate, role in cellular division, *review.* O'Brien, 267

**Cofactor requirement,** for albumin catabolism, by tumor mitochondrial fraction. Penn, 388

**Colchicine,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, method for studying mitotic rates in malignant rat tumors. Bertalanffy and Lau, 627

**Collagen,** content in transplanted tumors in rodents. Gullino, Grantham, and Clark, 1031

——, plate assay, biological studies on cytotoxic agents. Bhuyan, Renis, and Smith, 1131

——, plate assay, for cytotoxic agents. Renis, Johnson, and Bhuyan, 1126

**Comments,** on report of United Nations Scientific Committee on effects of atomic radiation. Upton, 1139

**Copper compounds,** lack of carcinogenicity in rats and mice. Gilman, 158

**Corpora lutea,** necrosis of, induced by 7,12-dimethylbenzanthracene. Wong, Warner, and Yang, 1053

**Cortisone,** action in increasing metastases, in rabbits. Zeidman, 501

——, effect on spontaneous and methylcholanthrene-induced leukemia in mice. Liebelt and Liebelt, 1180

——, effect on uracil incorporation into liver and tumor RNA, rat. Cantarow, Williams, and Paschkis, 1021

——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, relation to metastases, in mouse. Albert and Zeidman, 1297

**Crabb sarcoma,** hamster, effect of actinogan on, *in vivo.* Bradner and Sugiura, 167

——, lysozyme in kidney and spleen of hamsters bearing. Cappuccino, Reilly, and Winston, 850

***Crithidia fasiculata,*** susceptibility to antitumor antibiotics. Price, Buck, Schlein, and Siminoff, 885

**Cucurbitacins,** antitumor effect of, on Ehrlich ascites. Gallily, Shohat, Kalish, Gitter, and Lavie, 1038

**Culture.** *See* Tissue culture.

**Cupric acetate,** ineffective in inducing rat tumors upon injection. Miller, Enomoto, and Miller, 1381

**Cupric chelate,** of *N*-hydroxy-2-acetylaminofluorene, carcinogenicity in rat. Miller, Enomoto, and Miller, 1381

**Cupric oxide,** ineffective in inducing rat tumors upon injection. Miller, Enomoto, and Miller, 1381

**Cycloheximide,** inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

——, inhibitory in broth dilution assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Cyclophosphamide,** effect on development of sublines of leukemia, rat. Armaghan, 1075

——, effects on mouse lymphoid leukemia L1210 subcutaneously and intracerebrally. Chirigos, Humphreys, and Goldin, 187

——, effect on proteins of L1210 leukemia. Strozier and Nyhan, 1332

——, effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

——, treatment of plasmacytomas growing in hamsters with, *in vivo.* Wheeler, Alexander, Dodson, and Briggs, 1309

**Cysteine,** effect on metabolic changes in rat liver produced by carcinogenic N-nitrosodialkylamines. Mizrahi and Emmelot, 339

**Cytochemical studies,** on changes in chick embryo cells by Rous virus. Hampton and Eidinoff, 1061

**Cytochrome oxidase,** effect on hydrophobic phenolic compounds on. Dietrich, 1327

**Cytology,** in normal and tumorous rat liver, DNA in. Koulish and Lessler, 1188

——, of primary explants of human neoplasms, effect of Vincaleukoblastine on. Walker and Wright, 1267

**Cytotoxic agents,** alkylating, mechanisms of action, *review.* Wheeler, 651

——, collagen plate assay for. Renis, Johnson, and Bhuyan, 1126

**Cytotoxic tests,** against Gross lymphoma. Slettenmark and Klein, 947

**Cytoxan.** *See* Cyclophosphamide.

**DAB.** *See p*-Dimethylaminoazobenzene.

**DBA.** *See* 1,2,5,6-Dibenzanthracene.

**Defense mechanisms,** host, in regression of Sarcoma 180 in pyridoxine-deficient mice. Mihich, 218

**Dehydrogenases,** activity in hamster cheek pouch during experimental carcinogenesis. Mori, Miyaji, Murata, and Nagasuna, 1323

**2′-Deoxyadenosine,** inhibition of aspartate transcarbamylase by. Bresnick, 1246

**2′-Deoxyadenosine-5′-monophosphate,** inhibition of aspartate transcarbamylase by. Bresnick, 1246

**Deoxyadenosine 1-*N*-oxide,** effect on nucleic acid synthesis in ascites tumor cells *in vitro*. Fredericksen and Klenow, 125

**Deoxycorticosterone,** relation to metastases, in mouse. Albert and Zeidman, 1297

**2-Deoxy-D-glucose,** respiratory inhibition induced in Ehrlich ascites tumor cells by. Ibsen, Coe, and McKee, 182

**2′-Deoxyguanosine,** inhibition of aspartate transcarbamylase by. Bresnick, 1246.

**Deoxyribonucleic acid.** *See also* Nucleic acids.

——, effect of puromycin on duplication of. Mueller, Kajiwara, Stubblefield, and Rueckert, 1084

——, from parotid gland tumors, oncogenic properties of, in mice. Hays and Carr, 1319

——, incorporation of aminouracil mustard into, in tissues of tumor-bearing rats. Byvoet and Busch, 249

——, incorporation of iododeoxycytidine into, in mouse and rat. Kriss, Tung, and Bond, 1257

——, in normal and tumorous rat liver. Koulish and Lessler, 1188

——, 6-methylaminopurine utilized for synthesis of. Jamison, Huff, and Gordon, 1252.

——, synthesis and cell renewal in regenerating rat liver. Grisham, 842

——, synthesis, and folates in cell division, *review*. O'Brien, 267

——, synthesis of, in chromosomes of HeLa cells. Stubblefield and Mueller, 1091

**Deoxyuridine kinase,** during development of resistance to 5-5-fluorouracil. Reichard, Sköld, Klein, Révész, and Magnusson, 235

**Deoxyuridine phosphorylase,** during development of resistance to 5-fluorouracil. Reichard, Sköld, Klein, Révész, and Magnusson, 235

**Desacetylthiocolchicine,** tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

**Desertomycin,** inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

**3,7-Diacetoxy-1,2,5,6-dibenzanthracene,** not carcinogenic to mouse skin. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

***N,N′*-Diacetyl-4,4′-diamino-diphenylmethane.** *See* *p,p′*-Methylenediacetanilide.

***N,N′*-Diacetyl-fluoren-2,5-diamine.** *See* 2,5-Bis(acetylamino)-fluorene.

**2,6-Diaminopurine,** with hadacidin, effect on *E. coli*. Shigeura and Gordon, 1356

**O-Diazoacetyl-L-serine.** *See* Azaserine.

**6-Diazo-5-oxo-L-norleucine,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

——, effects on nucleic acid metabolism. Barclay, Garfinkel, and Phillipps, 809

——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Dibenz[*a,c*]anthracene.** *See* 1,2,3,4-Dibenzanthracene.

**Dibenz[*a,h*]anthracene.** *See* 1,2,5,6-Dibenzanthracene.

**Dibenzanthracene,** derivatives of, carcinogenic activities. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

**1,2,3,4-Dibenzanthracene,** not carcinogenic to mouse skin. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

——, tritiated, binding to soluble proteins of mouse skin. Abell and Heidelberger, 931

——, tritiated, preparation of. Giovanella, Abell, and Heidelberger, 925

**1,2,5,6-Dibenzanthracene,** tritiated, binding to soluble proteins of mouse skin. Abell and Heidelberger, 931

——, tritiated, preparation of. Giovanella, Abell, and Heidelberger, 925

**1,2,5,6-Dibenz-3,4-anthraquinone,** not carcinogenic to mouse skin. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

**1,2,5,6-Dibenz-9,10-anthraquinone,** not carcinogenic to mouse skin. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

**3,4,9,10-Dibenzpyrene,** chemotherapy of mouse tumors induced by. Homburger, Russfield, Baker, and Tregier, 368

**3′,5′-Dichloroamethopterin,** effect on sublines of Ehrlich carcinoma compared with amethopterin. Sartorelli and Booth, 94

——, treatment of leukemic mice with, formate-$C^{14}$ incorporation during. Schrecker, Mead, and Goldin, 15

**Dienestrol,** effect on electron transport in tumor mitochondrial extracts. Dietrich, 1327

**Diet,** deficient in folic acid, and effect on tumor growth in rat. Rosen and Nichol, 495

——, effect of ethionine on free nucleotides in rat liver. Caldarera, Budini, Barbiroli, and Rabbi, 1026

——, effect of heated fat in, on carcinogenic activity of 2-acetylaminofluorene. Sugai, Witting, Tsuchiyama, and Kummerow, 510

——, effect on uracil incorporation into liver and tumor RNA, rat. Cantarow, Williams, and Paschkis, 1021

——, low-fat, effect on benzpyrene hydroxylase activity in gastrointestinal tract. Wattenberg, Leong, and Strand, 1120

**Diethylenephosphoramides,** alkyl and aralkyl, structure and carcinostatic activity of. Crossley, Kuh, and Allison, 549

**Diethylnitrosamine,** effect of cysteine on metabolic changes in rat liver produced by. Mizrahi and Emmelot, 339

**Diethylstilbestrol,** effect on electron transport in tumor mitochondrial extracts. Dietrich, 1327

——, given to rats with mammary tumors, with and without ovariectomy, purine metabolism in. Wheeler, Alexander, Dodson, and Briggs, 1309

**6α,9α-Difluoroprednisolone,** relation to metastases, in mouse. Albert and Zeidman, 1297

**Dihydrofolate reductase,** increased, associated with amethopterin resistance in mouse leukemia. Friedkin, Crawford, Humphreys, and Goldin, 600

——, in sensitive and resistant leukemic cells. Friedkin and Goldin, 607

**3,4-Dihydroxy-3,4-dihydro-1,2,5,6-dibenzanthracene,** not carcinogenic to mouse skin. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

**Dimethane sulfonoxybutane.** *See* Myleran.

**1,6-Dimethane sulfonyl-D-mannitol,** tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

**3,4-Dimethoxy-1,2,5,6-dibenzanthracene,** moderately active carcinogen on mouse skin. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

**3,7-Dimethoxy-1,2,5,6-dibenzanthracene,** not carcinogenic to mouse skin. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

***p*-Dimethylaminoazobenzene,** carbon incorporation into rat liver nucleic acid. Berenbom, 1343

——, liver cancer induced by, in rat, glucokinase activity and glycogen levels. Shatton, Donnelly, and Weinhouse, 1372

——, liver carcinogenesis induced by, subcellular distribution of metallic cations. Bresciani and Auricchio, 1284

——, liver tumors induced by, cytological aspects, in rat. Koulish and Lessler, 1188

——, mitotic activity in rat liver during carcinogenesis by. Daoust, 743

**2-Dimethylamino-3-nitrofluorene,** little carcinogenic activity of. Miller, Fletcher, Margreth, and Miller, 1002

**2′,6-Dimethyl-1,2-benzanthracene,** weak carcinogenic activity of, on mouse skin. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

**7,12-Dimethylbenz[*a*]anthracene.** *See* 9,10-Dimethyl-1,2-benzanthracene.

**9,10-Dimethyl-1,2-benzanthracene,** administered to hamster cheek pouch, enzymatic processes in. Mori, Miyaji, Murata, and Nagasuna, 1323

——, applied to hamster cheek pouch, changes in enzymes. Scott, Morris, Reiskin, and Pakoskey, 857

——, injected into mice, induction of malignant lymphoma by. Rappaport and Baroni, 1067

——, in mammary cancer induction, and role of ovarian hormones. Dao, 973

——, mammary tumors induced in rats with, purine metabolism in. Wheeler, Alexander, Dodson, and Briggs, 1309

——, necrosis of endocrine glands induced by. Wong, Warner, and Yang, 1053

——, tritiated, binding to soluble proteins of mouse skin. Abell and Heidelberger, 931

——, tritiated, preparation of. Giovanella, Abell, and Heidelberger, 925

**7,14-Dimethyldibenz[*a*,*h*]anthracene.** *See* 9,10-Dimethyl-1,2,5,6-dibenzanthracene.

**9,10-Dimethyl-1,2,5,6-dibenzanthracene,** active carcinogen for mouse skin. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

——, tritiated, binding to soluble proteins of mouse skin. Abell and Heidelberger, 931

——, tritiated, preparation of. Giovanella, Abell, and Heidelberger, 925

***N,N*-Dimethyl-3-nitrofluoren-2-amine.** *See* 2-Dimethylamino-3-nitrofluorene.

**Dimethylnitrosamine,** effect of cysteine on metabolic changes in rat liver produced by. Mizrahi and Emmelot, 339

**2,5-Dinitrofluorene,** little carcinogenic activity of. Miller, Fletcher, Margreth, and Miller, 1002

**2,7-Dinitrofluorene,** comparative carcinogenicity of, in rat. Miller, Fletcher, Margreth, and Miller, 1002

**Dinitrophenol,** effects on fatty acid oxidation by transplantable tumors. Ellis and Scholefield, 305

**2,4-Dinitrophenol,** effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

——, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Disodium versenate,** effect on cellular adhesion and stickiness. Berwick and Coman, 982

**DNA.** *See* Deoxyribonucleic acid.

**Dogs,** benzpyrene hydroxylase activity in duodenum of. Wattenberg, Leong, and Strand, 1120

——, toxic and pathologic effects of methylglyoxal-bis(guanylhydrazone) in. Mihich, Simpson, and Mulhern, 962

**DON.** *See* 6-Diazo-5-oxo-L-norleucine.

**DPNH-coenzyme Q reductase,** effect of hydrophobic phenolic compounds on. Dietrich, 1327

**DPNH-cytochrome c reductase,** effect of hydrophobic phenolic compounds on. Dietrich, 1327

**DPNH-oxidase,** effect of hydrophobic phenolic compounds on. Dietrich, 1327

**Duazamycin A-Li,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Duazamycin B-Na,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Dunning hepatoma,** solid, rat, phosphatides of. Figard and Greenberg, 361

**Eagle's KB cells.** *See* KB cells.

**Earle's L strain cells.** *See* Strain L cells.

**Echinomycin,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Ehrlich ascites tumor cells,** effect of azauridine on. Bruemmer, Holland, and Sheehe, 113

——, effect of deoxyadenosine 1-*N*-oxide on nucleic acid synthesis in. Fredericksen and Klenow, 125

——, effects of folinic acid on inhibition of, by amethopterin. Sartorelli, Upchurch, and Booth, 102

——, effect of hydrocortisone on. Kodama, 1212

——, effects of uncoupling agents on fatty acid oxidation by. Ellis and Scholefield, 305

——, effect of viruses on, in mice. Kurlwich, Jacobs, Weisman, and Southam, 322

——, hydrolysis of nucleotides by. Wallach and Ullrey, 228

——, inhibition of DNA thymine synthesis in, by fluorinated pyrimidines. Mukherjee and Heidelberger, 815

——, labeling of, following administration of labeled bromodeoxyuridine and bromodeoxycytidine to mice. Kriss and Révész, 254

——, lactic dehydrogenase-augmenting agent in. Yaffe, 573

——, metabolism of 6-methylaminopurine in mice bearing. Jamison, Huff, and Gordon, 1252

——, metabolism of 9-butyl-6-thioguanine in, with and without azaserine treatment. Kimball and LePage, 1301

——, $P^{32}$ uptake by liver phosphatides of mice bearing. Lee, Salmon, Mosser, and Loken, 1046

——, phosphatides of. Figard and Greenberg, 361

——, resistance of, against 5-fluorouracil. Reichard, Sköld, Klein, Révész, and Magnusson, 235

——, resistant, uridine kinase-deficient, and treatment with 5-fluourouracil. Sköld, Magnusson, and Révész, 1226

——, respiratory inhibitions induced by D-glucose and 2-deoxy-D-glucose in. Ibsen, Coe, and McKee, 182

——, thymidylate synthetase from various lines of. Häggmark, 568

——, transplanted subcutaneously, effect on skin epithelium of mouse. Argyris and Argyris, 73

**Ehrlich ascites carcinoma (Lettré),** effect of cucurbitacins on. Gallily, Shohat, Kalish, Gitter, and Lavie, 1038

**Ehrlich carcinoma,** comparative effects of amethopterin and 3′,5′-dichloroamethopterin on sublines of. Sartorelli and Booth, 94

——, lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850

——, mouse, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

**Ehrlich-Landschütz carcinoma,** solid, mouse, glucose, lactate, and lactic dehydrogenase activity in. Burgess and Sylvén, 581

**Elatericin A,** antitumor effect of, on Ehrlich ascites. Gallily, Shohat, Kalish, Gitter, and Lavie, 1038

**Elatericin B,** antitumor effect of, on Ehrlich ascites. Gallily, Shohat, Kalish, Gitter, and Lavie, 1038

**Elaterin methylether,** antitumor effect of, on Ehrlich ascites. Gallily, Shohat, Kalish, Gitter, and Lavie, 1038

**Electron microscopy,** histiocyte response to ascites tumor homografts. Journey and Amos, 998

——, of ascites tumor cells and resistant sublines. Hirono and Kojima, 282

**Electron microscopy**—*Continued*
——, of human endometrial carcinoma. Nilsson, 492
——, of pulmonary adenomas in mice. Svoboda, 1197
——, of radiation-induced myeloid leukemias in mice. Parsons, Upton, Bender, Jenkins, Nelson, and Johnson, 728
——, of transplantable hamster melanomas. Stäubli and Loustalot, 84
**Electron transport**, in tumor mitochondrial extracts, effect of hydrophobic phenolic compounds on. Dietrich, 1327
**Electrophoresis**, of globulins in bronchogenic carcinoma. Nettleship, 696
——, starch gel, for nuclear protein fraction of Walker 256 carcinosarcoma. Busch, Hnilica, Chien, Davis, and Taylor, 637
**Endometrial carcinoma**, human, electron microscopy of. Nilsson, 492
**Endomycin**, inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131
**Endotoxin**, lack of induction of metastases of rat tumor by. Fisher and Fisher, 478
**Endoxan.** *See* Cyclophosphamide.
**Environmental carcinogenesis**, *guest editorial*. Eckardt, 395
**Enzymatic processes**, in hamster cheek pouch during carcinogenesis, histochemical observations. Mori, Miyaji, Murata, and Nagasuna, 1323
**Enzymes**, agent augmenting activity of plasma lactic dehydrogenase. Yaffe, 573
——, aspartate transcarbamylase, in liver and hepatoma, feedback inhibition of. Bresnick, 1246
——, benzpyrene hydroxylase activity in gastrointestinal tract. Wattenberg, Leong, and Strand, 1120
——, catalase activity in hepatoma-bearing animals. Rechcigl, Price, and Morris, 874
——, dihydrofolate reductase in sensitive and resistant leukemic cells. Friedkin and Goldin, 607
——, effect of phenolic compounds on, in tumor mitochondria. Dietrich, 1327
——, effects on cellular adhesion and stickiness. Berwick and Coman, 982
——, folic acid reductase and amethopterin resistance in cultured mouse cells. Hakala and Ishihara, 987
——, of glucose-6-phosphate oxidation, in hamster cheek pouch. Scott, Morris, Reiskin, and Pakoskey, 857
——, hepatocarcinogenesis and precancerous loss of 5-hydroxytryptophan decarboxylase activity. Kizer, 196
——, increased dihydrofolate reductase associated with amethopterin resistance in mouse leukemia. Friedkin, Crawford, Humphreys, and Goldin, 600
——, in mouse liver, in degradation of azaserine. Jacquez and Sherman, 56
——, lactic dehydrogenase activity in interstitial fluid and mouse tumors. Burgess and Sylvén, 581
——, limiting, for glycogen storage in tumors. Nigam, MacDonald, and Cantero, 131
——, of uracil pathway, during development of resistance to 5-fluorouracil. Reichard, Sköld, Klein, Révész, and Magnusson, 235
——, role in lactate production by Sarcoma 180 in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 1230
——, thymidylate synthetase from tumor lines resistant to 5-fluouracil. Häggmark, 568
——, uridine kinase in Ehrlich ascites cells. Sköld, Magnusson, and Révész, 1226
**Enzyme systems**, proteolytic, of rat tissues, effect of growth of ovarian tumors on. Blackwood, Mateyko, and Mandl, 993
**Eponate**, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617
**Epoxides**, mechanism of action as cytotoxic alkylating agent, *review*. Wheeler, 651
***Escherichia coli* B**, effect of hadacidin on. Shigeura and Gordon, 1356
**Esterase**, activity in hamster cheek pouch during experimental carcinogenesis, Mori, Miyaji, Murata, and Nagasuna, 1323
**Estradiol**, effect on electron transport in tumor mitochondrial extracts. Dietrich, 1327
**Estrogens**, and electron transport in tumor mitochondrial extracts. Dietrich, 1327
**Estrous cycle**, after implantation of hypophyses, and mammary tumors in mice. Boot, Mühlbock, Röpcke, and Tengbergen, 713
**Ethionine**, effect on free nucleotides in rat liver. Caldarera, Budini, Barbiroli, and Rabbi, 1026
**Ethionine hepatoma 2**, rat, collagen content of. Gullino, Grantham, and Clark, 1031
**Ethionine hepatoma 3**, rat collagen content of. Gullino, Grantham, and Clark, 1031
**Ethionine hepatoma T3-2**, rat, collagen content of. Gullino, Grantham, and Clark, 1031
**Ethyl carbamate.** *See* Urethan.
**2,2′-Ethylene bis(4-amino-6-hydroxpyrimidine)**, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352
**Ethyleneimines**, mechanism of action as cytotoxic alkylating agent, *review*. Wheeler, 651
**Ethyleneimino-*s*-triazine.** *See* Triethylenemelamine
**Ethylenephosphoramides**, structure and carcinostatic activity of. Crossley, Kuh, and Allison, 549
**9-Ethyl-6-mercaptopurine-S$^{35}$**, *in vivo* metabolism by the rat. Hansen, Giles, and Nadler, 761
***Euglena gracilis***, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617
**Eurocidin**, inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131
**Exercise**, influence on growth of transplanted rat tumors. Hoffman, Paschkis, DeBias, Cantarow, and Williams, 597

**Fats.** *See* Lipides.
**Fatty acid oxidation**, effects of uncoupling agents on, by transplantable tumors. Ellis and Scholefield, 305
**Fatty acids**, composition of mouse skin, during normal and abnormal growth. Carruthers, 294
——, long-chain, in rat hepatoma homogenates. Emmelot, 38
**Feedback inhibition**, in combination chemotherapy. Paigen, 1290
**Fibrosarcoma 4956**, rat, collagen content of. Gullino, Grantham, and Clark, 1031
**Fibrosarcoma 1F16F**, mitotic rates of. Bertalanffy and Lau, 627
**Fibrosarcomas**, induced by injection of 3,4,9,10-dibenzpyrene into mice. Homburger, Russfield, Baker, and Tregier, 368
**Filipin**, collagen plate assay for, with KB cells. Renis, Johnson, and Bhuyan, 1126
——, inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131
**Fish**, experimental induction of lesions of notochord of. Levy, 441
**Flexner-Jobling carcinoma**, lysozyme in kidney and spleen of rats bearing. Cappuccino, Reilly, and Winston, 850
——, rat, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167
**2-Fluorenamine.** *See* 2-Aminofluorene.
**Fluorene**, derivatives of, carcinogenicities of. Miller, Fletcher, Margreth, and Miller, 1002
***N*-2-Fluorenylacetamide.** *See* 2-Acetylaminofluorene.
***N*(2-Fluorenyl)formamide.** *See* 2-Formylaminofluorene.
***N*-2-Fluorenylmaleimide.** *See* 2-Malcimidofluorene.
**Fluorescent antibodies**, in cancer research, *review*. Glück, 895

——, in studies of chick embryo cells cultured with Rous virus. Hampton and Eidinoff, 1061

**Fluorinated pyrimidines,** inhibition of DNA thymine synthesis. Mukherjee and Heidelberger, 815

**3′-Fluoro-4-acetylaminobiphenyl,** comparative carcinogenicity of, in rat, Miller, Fletcher, Margreth, and Miller, 1002

**3-Fluoro-4-acetylbiphenyl,** synthesis of. Miller, Fletcher, Margreth, and Miller, 1002

**3′-Fluoro-4-acetylbiphenyl,** synthesis of. Miller, Fletcher, Margreth, and Miller, 1002

**3-Fluoro-4-acetylaminobiphenyl,** synthesis of. Miller, Fletcher, Margreth, and Miller, 1002

**3′-Fluoro-4-actylaminobiphenyl,** synthesis of. Miller, Fletcher, Margreth, and Miller, 1002

**5-Fluoro-2′-deoxycytidine,** inhibition of aspartate transcarbamylase by. Bresnick, 1246

——, inhibition of DNA thymine synthesis by, in ascites cells *in vitro*. Mukherjee and Heidelberger, 815

**5-Fluorodeoxyuridine,** inhibitory in broth dilution assay on KB cells. Bhuyan, Renis, and Smith, 1131

——, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**5-Fluoro-2′-deoxyuridine,** inhibition of aspartate transcarbamylase by. Bresnick, 1246

——, tested on H.Ep #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

**5-Fluoro-2′-deoxyuridine-5′-monophosphate,** inhibition of DNA thymine synthesis by, in ascites cells *in vitro*. Mukherjee and Heidelberger, 815

**5-Fluoro-2′-deoxyuridine-5′-triphosphate,** inhibition of DNA thymine synthesis by, in ascites cells *in vitro*. Mukherjee and Heidelberger, 815

**3-Fluoro-10-methyl-1,2-benzanthracene,** tritiated, binding to soluble proteins of mouse skin. Abell and Heidelberger, 931

——, tritiated, preparation of. Giovanella, Abell, and Heidelberger, 925

**4-Fluoro-10-methyl-1,2-benzanthracene,** tritiated, binding to soluble proteins of mouse skin. Abell and Heidelberger, 931

——, tritiated, preparation of. Giovanella, Abell, and Heidelberger, 925

**5-Fluoro-7-methylbenz[*a*]anthracene.** *See* 3-Fluoro-10-methyl-1,2-benzanthracene.

**6-Fluoro-7-methylbenz[*a*]anthracene.** *See* 4-Fluoro-10-methyl-1,2-benzanthracene.

**5-Fluoronicotinamide,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**2′-Fluoro-4′-phenylacetanilide.** *See* 3-Fluoro-4-acetylaminobiphenyl.

**4′-(*m*-Fluorophenyl)acetanilide.** *See* 3′-Fluoro-4-acetylaminobiphenyl.

***p*-Fluoro-DL-phenylalanine,** effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

***N*-[9-(4′-Fluorophenylimino)fluoren-2-yl]acetamide.** *See* 2-Acetylamino-9-(*p*-fluorophenylimino)fluorene.

**5-Fluorouracil,** enzymes during development of resistance to. Reichard, Sköld, Klein, Révész, and Magnusson, 235

——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, resistance against, in Ehrlich ascites cells. Sköld, Magnusson, and Révész, 1226

——, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

——, tested on chemically induced mouse tumors and transplants. Homburger, Russfield, Baker, and Tregier, 368

——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

——, thymidylate synthetase from tumor lines resistant to. Häggmark, 568

——, with hadacidin, effect on *E. coli*. Shigeura and Gordon, 1356

**5-Fluorouridine,** inhibition of aspartate transcarbamylase by. Bresnick, 1246

**Folic acid,** coenzymes, role in cellular division, *review*. O'Brien, 267

——, dietary restriction of, and inhibition of tumor growth in the rat. Rosen and Nichol, 495

——, antagonists, effects of amethopterin in cancer patients. Condit, Shnider, and Owens, 706

——, antagonists, resistance to, in mouse leukemia. Friedkin, Crawford, Humphreys, and Goldin, 600

**Folic acid reductase,** and amethopterin resistance in cultured mouse cells. Hakala and Ishihara, 987

**Folinic acid,** effects of amethopterin-induced inhibition of Ehrlich ascites carcinoma. Sartorelli, Upchurch, and Booth, 102

**Foreign body,** within transplantable tumors, inflammatory response to. Mahoney and Leighton, 334

**Formate-C$^{14}$,** incorporation in normal and leukemic mice, during amethopterin treatment. Schrecker, Mead, and Goldin, 15

——, incorporation into DNA thymine inhibited by 5-fluoro-2′-deoxyuridine-5′-monophosphate. Mukherjee and Heidelberger, 815

——, inhibition of incorporation of, into purine bases, by 6-diazo-5-oxo-L-norleucine. Barclay, Garfinkel, and Phillipps, 809

**2-Formylaminofluorene,** comparative carcinogenicity of, in rat. Miller, Fletcher, Margreth, and Miller, 1002

——, synthesis of. Miller, Fletcher, Margreth, and Miller, 1002

**Fortner intestinal carcinoma,** lysozyme in kidney and spleen of hamsters bearing. Cappuccino, Reilly, and Winston, 850

**Fortner pancreas adenocarcinoma,** hamster, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

**Fortner pancreatic carcinoma,** lysozyme in kidney and spleen of hamsters bearing. Cappuccino, Reilly, and Winston, 850

**Fortner small bowel adenocarcinoma,** hamster, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

**Fractionation, cellular.** *See* Cell fractionation.

**Friend virus,** leukemia induced by, and response to high oxygen tension. Libet and Siegel, 737

**Friend virus leukemia,** mouse, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

——, solid, lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850

**Fucose,** in plasma glycoproteins in human diseases. Macbeth and Bekesi, 1170

**Fumagillin,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Fungichromin,** collagen plate assay for, with KB cells. Renis, Johnson, and Bhuyan, 1126

——, inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

**Furth mammotropic tumor,** rat, hormonal and nutritional effects on uracil incorporation into RNA of. Cantarow, Williams, and Paschkis, 1021

**Galactosamine,** and glucosamine, in plasma glycoproteins in human diseases. Macbeth and Bekesi, 1170

**Galactose,** and mannose, of glycoprotein fraction of human plasma in disease. Macbeth and Bekesi, 1170

**Gardner lymphosarcoma 6C3HED.** *See* Lymphosarcoma 6C3HED Gardner.

**Gastric adenocarcinoma 328,** mouse, inflammatory response to foreign body within. Mahoney and Leighton, 334

**Gastric carcinoma 342,** rat, inflammatory response to foreign body within. Mahoney and Leighton, 334

**Germiston,** new virus in tumor-bearing mice. Krulwich, Jacobs, Weisman, and Southam, 322

**Glioma,** mouse, transplantable, induced host resistance to. Scheinberg, Levine, Suzuki, and Terry, 67

**Glioma 26,** lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850

——, mouse, effect of actinogan on, *in vivo.* Bradner and Sugiura, 167

**Gliotoxin,** inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

**γ-Globulin,** with lipopolysaccharide, effect on tumor growth. Antopol and Chryssanthou, 89

**Globulins,** serum, and bronchogenic carcinoma. Nettleship, 696

**Glucocorticoid activity,** of steroids, relation to metastasis, in mouse. Albert and Zeidman, 1297

**Glucokinase,** activity during hepatocarcinogenesis by azo dyes, in rat. Shatton, Donnelly, and Weinhouse, 1372

**Glucosamine,** and galactosamine, in plasma glycoproteins in human diseases. Macbeth and Bekesi, 1170

**Glucose,** change in balance, in leukemic rats. Freedland and Waisman, 701

——, in interstitial fluid and mouse tumors. Burgess and Sylvén, 581

**D-Glucose,** respiratory inhibition induced in Ehrlich ascites tumor cells by. Ibsen, Coe, and McKee, 182

**Glucose-6-phosphate dehydrogenase,** changes in, in hamster cheek pouch during carcinogenesis. Scott, Morris, Reiskin, and Pakoskey, 857

**Glucose-6-phosphate oxidation,** enzymes of, in hamster cheek pouch. Scott, Morris, Reiskin, and Pakoskey, 857

**β-Glucuronidase,** activity in hamster cheek pouch during experimental carcinogenesis. Mori, Miyaji, Murata, and Nagasuna, 1323

**L-Glutamine,** required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**Glycogen,** levels during hepatocarcinogenesis by azo dyes, in rat. Shatton, Donnelly, and Weinhouse, 1372

——, storage, limiting enzymes for, in tumors. Nigam, MacDonald, and Cantero, 131

**Glycogen synthetase,** in glycogen storage in tumors. Nigam, MacDonald, and Cantero, 131

**Glycolysis,** anaerobic, of human malignant and normal tissue. Macbeth and Bekesi, 244

**Glycoproteins,** plasma, in various disease states and cancer. Macbeth and Bekesi, 1170

——, urinary, in human leukemia. Tunis and Weinfeld, 764

**Gonadal hormones,** effect on spontaneous and methylcholanthrene-induced leukemia in mice. Liebelt and Liebelt, 1180

**Gonadectomy,** effect on spontaneous and methylcholanthrene-induced leukemia in mice. Liebelt and Liebelt, 1180

**Gramicidin,** collagen plate assay for, with KB cells. Renis, Johnson, and Bhuyan, 1126

——, inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

**Griseofulvin,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, oral, cocarcinogenic agent to cutaneous tumors. Barich, Schwarz, and Barich, 53

**Gross lymphoma,** induced resistance against, cytotoxic and neutralization tests. Slettenmark and Klein, 947

**Gross virus,** lymphomas induced by, resistance against. Klein, Sjögren, and Klein, 955

**Growth,** of transplanted rat tumors, influence of exercise on. Hoffman, Paschkis, DeBias, Cantarow, and Williams, 597

**Growth hormone,** effect on uracil incorporation into liver and tumor RNA, rat. Cantarow, Williams, and Paschkis, 1021

**Growth potential,** in human cell culture, chemicals required to induce cell alterations. Ludovici, Ashford, and Miller, 797

——, in human cell culture, induced and spontaneous alterations in. Ludovici, Ashford, and Miller, 788

**Growth rate,** of cultures of white spruce tissue. de Torok and Roderick, 174

**Guanine-8-$C^{14}$,** anabolism and catabolism by minced rat tissues. Wheeler, Alexander, Dodson, Briggs, and Morris, 769

**Guaroa,** new virus in tumor-bearing mice. Krulwich, Jacobs, Weisman, and Southam, 322

**Guerin epithelioma,** catabolism of xanthine and uracil in rats bearing. Wu and Bauer, 1239

**Guest editorial,** environmental carcinogenesis. Eckardt, 395

——, host-tumor relationship, primary factor in primary standard. Goldfeder, 523

**Guinea pig,** benzpyrene hydroxylase activity in duodenum of. Wattenberg, Leong, and Strand, 1120

——, tumors of, induced by methylcholanthrene. Blumenthal and Rogers, 1155

**H.Ad. #1.** *See* Human adenocarcinoma #1.

**Hadacidin.** *See* Niformyl hydroxyaminoacetate.

**Hamsters,** bearing plasmacytomas, treated *in vivo* with cyclophosphamide. Wheeler, Alexander, Dodson, and Briggs, 1309

——, benzpyrene hydroxylase activity in duodenum of. Wattenberg, Leong, and Strand, 1120

——, cheek pouch, carcinogenesis in, changes in enzymes of glucose-6-phosphate oxidation. Scott, Morris, Reiskin, and Pakoskey, 857

——, cheek pouch of, heterologous transplantation of human adenocarcinoma in. Yohn, Hammon, Atchison, and Casto, 443

——, cortisone-treated, heterotransplantation of choriocarcinoma into. Pierce, Midgley, and Verney, 563

——, elevation of lysozyme in kidney and spleen of tumor-bearing animals. Cappuccino, Reilly, and Winston, 850

——, experimental carcinogenesis in cheek pouch, enzymatic processes in. Mori, Miyaji, Murata, and Nagasuna, 1323

——, growth potentials of precancer of cervix uteri of. Mellgren, Boeryd, and Hagman, 139

——, transplantable melanomas of, electron microscopy of. Stäubli and Loustalot, 84

**Harding-Passey melanoma,** mouse, effect of actinogan on, *in vivo.* Bradner and Sugiura, 167

**HeLa cells,** effect of puromycin on DNA synthesis in. Mueller, Kajiwara, Stubblefield, and Rueckert, 1084

——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, susceptibility to antitumor antibotics. Price, Buck, Schlein, and Siminoff, 885

——, synthesis of DNA in chromosomes of. Stubblefield and Mueller, 1091

**HeLa-Gey,** modal distribution of cell variants, effects of heterologous sera. Murphy, Bullis, Landau, and Acosta, 906

**HeLa-S3,** modal distribution of cell variants, effects of heterologous sera. Murphy, Bullis, Landau, and Acosta, 906

**Heparin,** added to nutrient medium, effect on human sarcomas in tissue culture. Spatz, 914

**Hepatocarcinogenesis,** and precancerous loss of 5-hydroxytryptophan decarboxylase activity. Kizer, 196

**Hepatoma,** and normal liver, biochemical effects of hepatocarcinogens, *review.* Reid, 398

——, collagen content of. Gullino, Grantham, and Clark, 1031

——, ethionine-induced, rat, catalase activity in. Rechcigl, Price, and Morris, 874

——, rat, long-chain fatty acids in, and properties of mitochondria of. Emmelot, 38

——, rat and mouse, assayed for catalase activity. Rechcigl, Price, and Morris, 874

——, spontaneous, mouse, catalase activity in. Rechcigl, Price, and Morris, 874

**Hepatoma 129,** mouse, collagen content of. Gullino, Grantham, and Clark, 1031

**Hepatoma 134,** ascites, mouse, phosphatides of. Figard and Greenberg, 361

——, lactic dehydrogenase-augmenting agent in. Yaffe, 573

——, mouse, collagen content of. Gullino, Grantham, and Clark, 1031

**Hepatoma 3683.** *See* Morris hepatoma 3683.

**Hepatoma 3924A.** *See* Morris hepatoma 3924A.

**Hepatoma 3924C Morris.** *See* Morris hepatoma 3924C.

**Hepatoma 5123.** *See* Morris hepatoma 5123.

**Hepatoma 7800,** feedback inhibition of aspartate transcarbamylase in. Bresnick, 1246

**Hepatoma AH 13.** *See* Ascites hepatoma AH 13.

**Hepatoma BY 448,** rat, long-chain fatty acids in. Emmelot, 38

**Hepatoma BY 463,** rat, long-chain fatty acids in. Emmelot, 38

**Hepatoma BY 484,** rat, long-chain fatty acids in. Emmelot, 38

**Hepatoma H-35.** *See* Reuber H-35 hepatoma.

**Hepatoma HC,** rat, catalase activity in. Rechcigl, Price, and Morris, 874

**Hepatoma LC18,** rat, catalase activity in. Rechcigl, Price, and Morris, 874

——, rat, collagen content of. Gullino, Grantham, and Clark, 1031

**Hexokinase,** changes in, in hamster cheek pouch during carcinogenesis. Scott, Morris, Reiskin, and Pakoskey, 857

**Hexosamine,** in plasma glycoproteins in human diseases. Macbeth and Bekesi, 1170

**Hexose,** in plasma glycoproteins in human diseases. Macbeth and Bekesi, 1170

**Hexostrol,** effect on electron transport in tumor mitochondrial extracts. Dietrich, 1327

**L-Histidine,** required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**Histiocyte response,** to ascites tumor homografts, electron microscopy. Journey and Amos, 998

**Histochemical observations,** on enzymatic processes of carcinogenesis in hamster cheek pouch. Mori, Miyaji, Murata, and Nagasuna, 1323

**HN2.** *See* Methylbis(β-chloroethyl)amine.

**Hodgkin's disease,** tissue culture studies on. Sykes, Dmochowski, Shullenberger, and Howe, 21

**Homografts,** of skin, survival in methylcholanthrene-treated mice and mice with spontaneous mammary cancers. Linder, 380

**Hormones,** adrenal cortical, and growth of Sarcoma 180 in adrenalectomized mice. Benton, 1220

——, adrenotropic activity of mammo-somatotropic tumors in rats and mice. Takemoto, Yokoro, Furth, and Cohen, 917

——, effect of hydrocortisone on Ehrlich ascites tumor. Kodama, 1212

——, effect on uracil incorporation into liver and tumor RNA, rat. Cantarow, Williams, and Paschkis, 1021

——, given to rats with mammary tumors, purine metabolism in. Wheeler, Alexander, Dodson, and Briggs, 1309

——, in leukemogenesis in mice. Liebelt and Liebelt, 1180

——, ovarian, in mammary cancer induction by polynuclear hydrocarbons. Dao, 973

——, variant of thyrotropic tumor in mouse. Messier and Furth, 804

**Host defense mechanisms,** in regression of Sarcoma 180 in pyridoxine-deficient mice. Mihich, 218

**Host responses,** to transplantable ascitic tumor, in mouse. Siegler and Koprowska, 1278

**Host-tumor relationship,** *guest editorial.* Goldfeder, 523

**Human,** actinomycin D in treatment of trophoblastic disease. Ross, Stolbach, and Hertz, 1015

——, benzpyrene hydroxylase activity in duodenum of. Wattenberg, Leong, and Strand, 1120

——, cell culture, chemicals required to induce cell alterations. Ludovici, Ashford, and Miller, 797

——, cell culture, induced and spontaneous cell alterations. Ludovici, Ashford, and Miller, 788

——, cell strains, malignant and benign, from same individual. Norrby, Eriksson, and Mellgren, 147

——, chromosomal dichotomy in leukemia. Sandberg, Ishihara, Crosswhite, and Hauschka, 748

——, effects of amethopterin in cancer patients. Condit, Shnider, and Owens, 706

——, electron microscopy of endometrial carcinoma. Nilsson, 492

——, epithelial cells, modal distribution of cell variants in culture. Murphy, Bullis, Landau, and Acosta, 906

——, leukemia, urinary glycoproteins in. Tunis and Weinfeld, 764

——, leukemia and lymphoma, tissue culture studies on. Sykes, Dmochowski, Shullenberger, and Howe, 21

——, leukemic leukocytes, nuclei acid metabolism *in vitro.* Williams, 314

——, malignant and normal tissue, oxygen consumption and anaerobic glycolysis of. Macbeth and Bekesi, 244

——, neoplasms, primary explants, effect of Vincaleukoblastine on. Walker and Wright, 1267

——, neoplastic tissue, cultivation of, influence of carbon dioxide on. Rovin, 384

——, ovarian tumor, heterologous growth of, effect on rat enzymes. Blackwood, Mateyko, and Mandl, 993

——, plasma glycoproteins in various disease states and cancer. Macbeth and Bekesi, 1170

——, serum globulins and bronchogenic carcinoma. Nettleship, 696

——, skin cells, cultivated *in vitro,* effects of acetone and phenol on. Pace and Elliott, 107

——, tumor tissue, autoradiography of *in vitro* incorporation of uridine and thymidine. Wolberg and Brown, 1113

——, tumors, chromosome constitution of cells from, *in vitro.* Ishihara, Moore, and Sandberg, 375

——, urinary purines in leukemia. Park, Holland, and Jenkins, 469

**Human adenocarcinoma #1,** heterotransplantation in hamster cheek pouch. Yohn, Hammon, Atchison, and Casto, 443

**Human choriocarcinoma,** transplanted into hamsters, therapy of. Pierce, Midgley, and Verney, 563

**Human epidermoid carcinoma H.Ep. #1,** effects of purine analogs on growth of. Rich, Perez, and Eidinoff, 3

**Human epidermoid carcinoma H.Ep. #2,** effects of 9-alkylpurines on growth of. Kelley, Wheeler, and Montgomery, 329

**Human epidermoid carcinoma H.Ep. #3,** in conditioned mice, x-ray diagnostic procedures. Merker and Hurley, 646

——, lysozyme in kidney and spleen of hamsters bearing. Cappuccino, Reilly, and Winston, 850

——, transplantation in newborn Swiss mice and chemotherapy data. Merker, Bowie, and Anido, 352

**Human sarcoma No. 1**, lysozyme in kidney and spleen of hamsters bearing. Cappuccino, Reilly, and Winston, 850

**Human sarcomas**, in tissue culture, morphologic and histochemical features of. Spatz, 914

**Hydrocarbons**, carcinogenic, tritiated, binding to soluble skin proteins, mouse. Abell and Heidelberger, 931

——, guinea pig tumors induced by methylcholanthrene. Blumenthal and Rogers, 1155

——, polycyclic, and benzpyrene hydroxylase activity in gastrointestinal tract. Wattenberg, Leong, and Strand, 1120

——, polynuclear, in mammary cancer induction, and role of ovarian hormones. Dao, 973

——, tritiated carcinogenic, preparation and purification. Giovanella, Abell, and Heidelberger, 925

**Hydrocortisone**, effect on Ehrlich ascites tumor. Kodama, 1212

***N*-Hydroxy-2-acetylaminofluorene**, carcinogenicity in the rat. Miller, Enomoto, and Miller, 1381

——, urinary metabolites of, in rhesus monkey. Enomoto, Lotlikar, Miller, and Miller, 1336

**Hydroxyethylation**, effect on uptake of rat albumin by rat tissues. Starbuck and Busch, 1206

***N*-Hydroxy-*N*-2-fluorenylacetamide.** *See* *N*-hydroxy-2-acetylaminofluorene.

***N*-Hydroxylation**, of 2-acetylaminofluorene in the rabbit. Irving, 867

**5-Hydroxytryptophan decarboxylase**, hepatocarcinogenesis and precancerous loss of activity. Kizer, 196

**Hypophyseal tissue**, isografts of, and induction of mammary cancer in mice. Boot, Mühlbock, Röpcke, and Tengbergen, 713

**Hypophysectomy**, effect on uracil incorporation into liver and tumor RNA, rat. Cantarow, Williams, and Paschkis, 1021

——, of rats with mammary tumors, purine metabolism in. Wheeler, Alexander, Dodson, and Briggs, 1309

**Hypoxanthine**, alkyl derivatives of, effects on growth of H.Ep. #2 cells. Kelley, Wheeler, and Montgomery, 329

**Hypoxanthine-8-C$^{14}$**, anabolism and catabolism by minced rat tissues. Wheeler, Alexander, Dodson, Briggs, and Morris, 769

**Ilotycin**, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Immunity**, induced, of skin, vagina, and urinary bladder to bovine papillomatosis. Olson, Luedke, and Brobst, 463

——, induced tumor, to transplantable mouse glioma. Scheinberg, Levine, Suzuki, and Terry, 67

**Immunology**, antibodies to 1,2-naphthoquinone. Ollodart and Rose, 689

——, resistance against isotransplantation of lymphomas. Klein, Sjögren, and Klein, 955

**Inflammatory response**, to foreign body within transplantable tumors. Mahoney and Leighton, 334

**Inhibition**, respiratory, induced in Ehrlich ascites tumor cells by D-glucose. Ibsen, Coe, and McKee, 182

**Inhibitors**, metabolic, effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

——, metabolic, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Inoculation**, method of, compared on effect on Cytoxan on leukemia L1210. Chirigos, Humphreys, and Goldin, 187

**Interstitial fluid**, glucose, lactate, and lactic dehydrogenase activity in, in mouse. Burgess and Sylvén, 581

**Intestine**, benzpyrene hydroxylase activity in. Wattenberg, Leong, and Strand, 1120

——, mouse, enzymatic degradation of azaserine by. Jacquez and Sherman, 56

——, small, effect of 6-diazo-5-oxo-L-norleucine on nucleic acid metabolism in. Barclay, Garfinkel, and Phillipps, 809

**Iodoacetic acid**, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Iododeoxycytidine**, fate in mouse and rat. Kriss, Tung, and Bond, 1257

**5-Iodo-2′-deoxyuridine**, inhibition of aspartate transcarbamylase by. Bresnick, 1246

**IRC 741 leukemia**, in rats, effect of chemotherapy, development of sublines. Armaghan, 1075

**Iron compounds**, lack of carcinogenicity in rats and mice. Gilman, 158

**Irradiation.** *See also* Radiation and X-radiation.

——, of mouse, in induction of thyrotropic tumor. Messier and Furth, 804

**Isolation-perfusion**, of rat hind limb, technic for. Turner, Tod, Francis, Greenhill, and Couves, 49

**L-Isoleucine**, required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**Jensen sarcoma**, catabolism of xanthine and uracil in rats bearing. Wu and Bauer, 1239

——, lysozyme in kidney and spleen of rats bearing. Cappuccino, Reilly, and Winston, 850

——, rat, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

——, rat, resistant to mitomycin C, transplantation of. Merker, Reyes, and Anido, 1163

**KB cells**, biological studies, collagen plate assay for cytotoxic agents. Bhuyan, Renis, and Smith, 1131

——, in collagen plate assay for cytotoxic agents. Renis, Johnson, and Bhuyan, 1126

——, purine antagonists tested against, in mice. Montgomery, Schabel, and Skipper, 504

**Kidney**, elevated lysozyme in extracts of, in tumor-bearing animals. Cappuccino, Reilly, and Winston, 850

——, mouse, enzymatic degradation of azaserine by. Jacquez and Sherman, 56

——, normal, mouse or rat, inflammatory response to foreign body within. Mahoney and Leighton, 334

——, rat, effect of induced synthesis of pyridine nucleotides on metabolism of RNA in. Revel and Mandel, 456

——, tumors, in mice, induced by 20-methylcholanthrene-impregnated strings. Stevenson and von Haam, 1177

——, uptake of hydroxyethylated rat albumin by. Starbuck and Busch, 1206

**Krebs-2 ascites tumor**, mouse, effect of azauridine on. Bruemmer, Holland, and Sheehe, 113

**Krebs-2 carcinoma**, effects on lipide metabolism of mice. Costa and Holland, 1081

**Lactate**, in interstitial fluid and mouse tumors. Burgess and Sylvén, 581

——, production in homogenates of Sarcoma 180, enzyme activities. Fodor, Clarke, and Bodansky, 1230

**Lactic dehydrogenase**, activity in hamster cheek pouch during experimental carcinogenesis. Mori, Miyaji, Murata, and Nagasuna, 1323

——, activity in interstitial fluid and mouse tumors. Burgess and Sylvén, 581

——, activity in plasma, augmenting agent of, distribution and *in vitro* propagation. Yaffe, 573

**L-Leucine**, required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**Leukemia.** *See also* Lymphoma.

——, chloro-, spontaneous transplantable, in Wistar rat. Schreiner and Will, 757

——, chromosomal dichotomy in blood and marrow of acute. Sandberg, Ishihara, Crosswhite, and Hauschka, 748

——, chronic granulocytic, human leukocytes from, nucleic acid metabolism *in vitro*. Williams, 314

——, human, tissue culture studies on. Sykes, Dmochowski, Shullenberger, and Howe, 21

——, human, urinary glycoproteins in. Tunis and Weinfeld, 764

——, lymphatic, in mice, enzymes involved in glycogen storage in. Nigam, MacDonald, and Cantero, 131

——, mouse, amethopterin resistance in, associated with increased dihydrofolate reductase. Friedkin, Crawford, Humphreys, and Goldin, 600

——, myeloid, radiation-induced, in mouse, electron microscopy of. Parsons, Upton, Bender, Jenkins, Nelson, and Johnson, 728

——, rats, development of sublines, effect of chemotherapy. Armaghan, 1075

——, spontaneous and methylcholanthrene-induced, effect of hormones on. Liebelt and Liebelt, 1180

——, transplantable, rat, alterations of characteristics following transplantation. Freedland and Waisman, 701

——, urinary purines in, in human. Park, Holland, and Jenkins, 469

——, virus-induced, in mice, response to high oxygen tension. Libet and Siegel, 737

**Leukemia Friend virus.** *See* Friend virus leukemia.

**Leukemia L1210,** amethopterin resistance in, and dihydrofolate reductase. Friedkin, Crawford, Humphreys, and Goldin, 600

——, effect of Cytoxan on proteins of, in sensitive and resistant strains. Strozier and Nyhan, 1332

——, effect of Cytoxan on, subcutaneously and intracerebrally. Chirigos, Humphreys, and Goldin, 187

——, histiocyte response to ascites form of. Journey and Amos, 998

——, incorporation of formate-$C^{14}$ in mice bearing, during amethopterin treatment. Schrecker, Mead, and Goldin, 15

——, mouse, effect of azauridine on. Bruemmer, Holland, and Sheehe, 113

——, purine antagonists tested against, in mice. Montgomery, Schabel, and Skipper, 504

**Leukemia L4946,** lymphatic, mouse, phosphatides of. Figard and Greenberg, 361

——, mouse, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

——, solid, lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850

**Leukemia P-288 cells,** mouse, effect of azauridine on. Bruemmer, Holland, and Sheehe, 113

**Leukemic cells,** sensitive and resistant, dihydrofolate reductase in. Friedkin and Goldin, 607

——, transplantation of, into rats, and polyoma tumor formation, Kirsten, Anderson, Platz, and Crowell, 484

**Leukocytes,** leukemic, nucleic acid metabolism *in vitro*. Williams, 314

**Lewis bladder carcinoma,** lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850

——, mouse, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

**Lewis lung carcinoma,** lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850

——, mouse, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

**Limb,** hind, rat, isolation-perfusion technic for. Turner, Tod, Francis, Greenhill, and Couves, 49

**Lipide metabolism,** effects of Krebs-2 carcinoma on, in mice. Costa and Holland, 1081

——, in liver, changes in mouse following injection of ascitic tumor. Siegler and Koprowska, 1278

**Lipides,** and phosphatides of mouse ascites tumors and rat hepatomas. Figard and Greenberg, 361

——, effect of heated fat on carcinogenic activity of 2-acetylaminofluorene. Sugai, Witting, Tsuchiyama, and Kummerow, 510

——, heated, effect on carcinogenic activity of 2-acetylaminofluorene. Sugai, Witting, Tsuchiyama, and Kummerow, 510

——, in homogenates of rat hepatomas. Emmelot, 38

——, of mouse skin, during normal and abnormal growth. Carruthers, 294

**Lipopolysaccharide,** from *Proteus vulgaris*, with γ-globulin, effect on tumor growth. Antopol and Chryssanthou, 89

**Liver,** aspartate transcarbamylase in, feedback inhibition. Bresnick, 1246

——, biochemical effects of hepatocarcinogens, *review*. Reid, 398

——, carcinogenesis, and precancerous loss of 5-hydroxytryptophan decarboxylase activity. Kizer, 196

——, catalase activity in tissues of hepatoma-bearing animals. Rechcigl, Price, and Morris, 874

——, effect of 6-diazo-5-oxo-L-norleucine on nucleic acid metabolism in. Barclay, Garfinkel, and Phillipps, 809

——, long-chain fatty acids in rat hepatoma homogenates and properties of mitochondria. Emmelot, 38

——, metabolic changes in, as host response to transplantable ascitic tumor, in mouse. Siegler and Koprowska, 1278

——, mouse, enzymatic degradation of azaserine by. Jacquez and Sherman, 56

——, mouse, $P^{32}$ uptake by phosphatides of. Lee, Salmon, Mosser, and Loken, 1046

——, normal and regenerating, rat, effects of thioacetamide on protein metabolism of. Muramatsu and Busch, 1100

——, normal and tumorous, in rat, cytological aspects. Koulish and Lessler, 1188

——, normal, mouse or rat, inflammatory response to foreign body within. Mahoney and Leighton, 334

——, phosphatides in, compared with rat hepatomas. Figard and Greenberg, 361

——, rat, changes in metabolism of, during carcinogenesis or regeneration. Burke, 10

——, rat, ductal proliferation and portal blood supply. Weingren and Ghorpade, 881

——, rat, effect of cysteine on metabolic changes in, produced by carcinogenic *N*-nitrosodialkylamines. Mizrahi and Emmelot, 339

——, rat, effect of ethionine on free nucleotides of. Caldarera, Budini, Barbiroli, and Rabbi, 1026

——, rat, glucokinase activity and glycogen levels during cancer induction in. Shatton, Donnelly, and Weinhouse, 1372

——, rat, microsomal activity after aminofluorene treatment. Arrhenius and Hultin, 823

——, rat, mitotic activity during DAB carcinogenesis. Daoust, 743

——, rat, nucleic acid synthesis, carbon incorporation from *p*-dimethylaminoazobenzene. Berenbom, 1343

——, rat, uracil incorporation into RNA of. Cantarow, Williams, and Paschkis, 1021

——, rat and mouse, collagen content of, compared with hepatomas. Gullino, Grantham, and Clark, 1031

——, regenerating, rat, cell renewal in. Grisham, 842

——, regeneration of, rat, changes in metabolism during. Burke, 10

**Liver**—*Continued*

——, subcellular distribution of metallic cations in carcinogenesis of, in rat. Bresciani and Auricchio, 1284

——, uptake of hydroxyethylated rat albumin by. Starbuck and Busch, 1206

**Lung.** *See also* Pulmonary.

——, uptake of hydroxyethylated rat albumin by. Starbuck and Busch, 1206

**Lung adenomas,** induced by transplacental exposure to urethan, in mice. DiPaolo, 299

——, in mice, electron microscopy of. Svoboda, 1197

——, in mice, induced by cigarette smoke condensate and urethan. DiPaolo and Sheehe, 1058

**Luteomycin,** inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

**Lymphoma.** *See also* Leukemia.

——, induced by Gross virus, resistance against isotransplantation of. Klein, Sjögren, and Klein, 955

——, malignant, human, tissue culture studies on. Skyes, Dmochowski, Shullenberger, and Howe, 21

——, malignant, induced in mice by 7,12-dimethylbenz[*a*]anthracene. Rappaport and Baroni, 1067

**Lymphoma E.L. 4,** histiocyte response to ascites form of. Journey and Amos, 998

**Lymphoma L1210.** *See* Leukemia L1210.

**Lymphosarcoma,** bovine, clinical aspects and herd studies. Marshak, Coriell, Lawrence, Croshaw, Schryver, Altera, and Nichols, 202

——, spontaneous, in amphibians. Balls, 1142

**Lymphosarcoma 6C3HED Gardner,** ascites, mouse, phosphatides of. Figard and Greenberg, 361

**Lymphosarcoma Mecca,** lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850

——, mouse, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

**Lymphosarcoma Murphy-Sturm,** influence of exercise on growth of, in rat. Hoffman, Paschkis, DeBias, Cantarow, and Williams, 597

——, lysozyme in kidney and spleen of rats bearing. Cappuccino, Reilly, and Winston, 850

——, rat, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

——, rat, hormonal and nutritional effects on uracil incorporation into RNA of. Cantarow, Williams, and Paschkis, 1021

**Lymphosarcoma R-2788,** rat, collagen content of. Gullino, Grantham, and Clark, 1031

**L-Lysine,** required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**Lysozyme,** elevation in kidney and spleen, in tumor-bearing rodents. Cappuccino, Reilly, and Winston, 850

**Maben strain cells,** modal distribution of cell variants, effects of heterologous sera. Murphy, Bullis, Landau, and Acosta, 906

**Magnesium,** subcellular pattern in liver carcinogenesis, in rat. Bresciani and Auricchio, 1284

**Magnesium ions,** inhibit cell alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**2-Maleimidofluorene,** little carcinogenic activity of. Miller, Fletcher, Margreth, and Miller, 1002

**Malic dehydrogenase,** activity in hamster cheek pouch during experimental carcinogenesis. Mori, Miyaji, Murata, and Nagasuna, 1323

**Malonic acid,** tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Mammary adenocarcinoma.** *See* Adenocarcinoma.

**Mammary cancer,** induction in mice, by hypophyseal isografts. Boot, Mühlbock, Röpcke, and Tengbergen, 713

——, ovarian hormones and polynuclear hydrocarbons in induction of, in rats. Dao, 973

——, spontaneous, mouse, survival of skin homografts in. Linder, 380

**Mammary carcinoma.** *See also* Carcinoma.

——, induced in rat by *N*-hydroxy-2-acetylaminofluorene. Miller, Enomoto, and Miller, 1381

——, lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850

——, solid, mouse, glucose, lactate, and lactic dehydrogenase activity in. Burgess and Sylvén, 581

**Mammary carcinoma 755.** *See* Adenocarcinoma 755

**Mammary carcinoma C3HBA,** mouse, inflammatory response to foreign body within. Mahoney and Leighton, 334

**Mammary carcinoma H52454,** mouse, inflammatory response to foreign body within. Mahoney and Leighton, 334

**Mammary tumors,** induced, in rats, purine metabolism in, following various treatments. Wheeler, Alexander, Dodson, and Briggs, 1309

**Mammo-somatotropic tumors,** in rats and mice, adrenotropic activity in. Takemoto, Yokoro, Furth, and Cohen, 917

**Mannose,** and glactose, of glycoprotein fraction of human plasma in disease. Macbeth and Bekesi, 1170

**Marrow, bone.** *See* Bone marrow.

**Mc1M rhabdomyosarcoma,** solid, mouse, glucose, lactate, and lactic dehydrogenase activity in. Burgess and Sylvén, 581

**Mecca lymphosarcoma.** *See* Lymphosarcoma Mecca.

**Mechlorethamine.** *See* Methylbis(β-chloroethyl)amine.

**3′-Me-DAB.** *See* 3′-Methyl-4-dimethylaminoazobenzene.

**M-melanoma 1,** hamster, electron microscopy of. Stäubli and Loustalot, 84

**Melanoma,** in mice, enzymes involved in glycogen storage in. Nigam, MacDonald, and Cantero, 131

——, malignant, solid, mouse, glucose, lactate, and lactic dehydrogenase activity in. Burgess and Sylvén, 581

——, hamster, transplantable, electron microscopy of. Stäubli and Loustalot, 84

**Melanoma Harding-Passey.** *See* Harding-Passey melanoma.

**Melphalan,** effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

**6-Mercaptopurine,** alkyl derivatives of, effects on growth of H.Ep. #2 cells. Kelley, Wheeler, and Montgomery, 329

——, derivatives of, *in vivo* metabolism by the rat. Hansen, Giles, and Nadler, 761

——, effect on growth of H.Ep. #1 and chick embryo fibroblast cells. Rich, Perez, and Eidinoff, 3

——, glycolysis by Sarcoma 180 in mice treated with. Fodor, Clarke, and Bodansky, 1230

——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, ribonucleoside and ribonucleotide of, chemotherapeutic effectiveness of. Montgomery, Schabel, and Skipper, 504

——, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

——, with hadacidin, effect on *E. coli*. Shigeura and Gordon, 1356

**6-Mercaptopurine riboside,** effect on growth of H.Ep. #1 and chick embryo fibroblast cells. Rich, Perez, and Eidinoff, 3

**Mesenchymoma,** transplantable metastasizing, in rat. Maddock, Kury, and Riley, 291

**Metabolic inhibitors,** effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

——, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Metal carcinogenesis,** effect of cobalt oxide and thorium dioxide, in rats and mice. Gilman and Ruckerbauer, 152

——, study of cobalt, copper, iron, and nickel compounds in mice and rats. Gilman, 158

**Metallic cations,** subcellular distribution in liver carcinogenesis, in rat. Bresciani and Auricchio, 1284

**Metastases,** and surface properties of cancer cells, *review.* Abercrombie and Ambrose, 525

——, cortisone action in increasing, in rabbits. Zeidman, 501

——, differential response to tumor cell emboli in rabbit. Potter, Buttarazzi, and Cozzarelli, 1202

——, hepatic, effect of reticuloendothelial stimulation, in the rat. Fisher and Fisher, 478

——, relation of glucocorticoid activity of steroids to, in mouse. Albert and Zeidman, 1297

——, of transplantable rhabdomyosarcoma, in rat. Maddock, Kury, and Riley, 291

**L-Methionine,** required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**Methionine-S$^{35}$,** incorporation into protein of sensitive and resistant strains of leukemia L1210. Strozier and Nyhan, 1332

**Methotrexate,** effects of folinic acid on inhibition of Ehrlich ascites carcinoma induced by. Sartorelli, Upchurch, and Booth, 102

——, effects of large doses in cancer patients. Condit, Shnider, and Owens, 706

——, effect on development of sublines of leukemia in rat. Armaghan, 1075

——, effect on sublines of Ehrlich carcinoma compared with 3′,5′-dichloroamethopterin. Sartorelli and Booth, 94

——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, rat tumor refractory to, and effect of dietary restriction of folic acid on tumor growth. Rosen and Nichol, 495

——, resistance, and chromosomal constitution, in cultured mouse cells. Hakala and Ishihara, 987

——, resistance in mouse leukemia, and dihydrofolate reductase. Friedkin, Crawford, Humphreys, and Goldin, 600

——, tested against heterotransplanted choriocarcinoma. Pierce, Midgley, and Verney, 563

——, tested in collagen plate assay on KB cells, Bhuyan, Renis, and Smith, 1131

——, tested on chemically induced mouse tumors and transplants. Homburger, Russfield, Baker, and Tregier, 368

——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

——, treatment of leukemic mice with, formate-C$^{14}$ incorporation during. Schrecker, Mead, and Goldin, 15

——, trophoblastic disease resistant to, treated with actinomycin D, in women. Ross, Stolbach, and Hertz, 1015

——, with hadacidin, effect on *E. coli.* Shigeura and Gordon, 1356

**3-Methoxy-1,2,5,6-dibenzanthracene,** weak carcinogenic activity of, on mouse skin. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

**9-Methoxy-1,2,5,6-dibenzanthracene,** active carcinogen for mouse skin. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

**4′-Methyl-4-actylaminobiphenyl,** little carcinogenic activity of. Miller, Fletcher, Margreth, and Miller, 1002

**6-Methylaminopurine,** metabolic studies on, in mice. Jamison, Huff, and Gordon, 1252

**5-Methylbenz[*a*]anthracene.** *See* 3-Methyl-1,2-benzanthracene.

**6-Methylbenz[*a*]anthracene.** *See* 4-Methyl-1,2-benzanthracene.

**7-Methylbenz[*a*]anthracene.** *See* 10-Methyl-1,2-benzanthracene.

**3-Methyl-1,2-benzanthracene,** tritiated, binding to soluble proteins of mouse skin. Abell and Heidelberger, 931

——, tritiated, preparation of. Giovanella, Abell, and Heidelberger, 925

**4-Methyl-1,2-benzanthracene,** tritiated, binding to soluble proteins of mouse skin. Abell and Heidelberger, 931

——, tritiated, preparation of. Giovanella, Abell, and Heidelberger, 925

**10-Methyl-1,2-benzanthracene,** tritiated, binding to soluble proteins of mouse skin. Abell and Heidelberger, 931

——, tritiated, preparation of. Giovanella, Abell, and Heidelberger, 925

**Methylbis(β-chloroethyl)amine,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

**3- or 20-Methylcholanthrene,** effect of oral griseofulvin on mouse cutaneous tumors induced by. Barich, Schwarz, and Barich, 53

——, effect on survival of skin homografts, in mouse. Linder, 380

——, glioma in mouse induced by, host resistance to. Scheinberg, Levine, Suzuki, and Terry, 67

——, guinea pig tumors induced by. Blumenthal and Rogers, 1155

——, in mammary cancer induction, and role of ovarian hormones. Dao, 973

——, kidney tumors induced in mice by strings impregnated with. Stevenson and von Haam, 1177

——, leukemia induced by, effect of hormones on, in mice. Liebelt and Liebelt, 1180

——, tritiated, binding to soluble proteins of mouse skin. Abell and Heidelberger, 931

——, tritiated, preparation of. Giovanella, Abell, and Heidelberger, 925

**3′-Methyldimethylaminoazobenzene,** liver cancer induced by, in rat, glucokinase activity and glycogen levels. Shatton, Donnelly, and Weinhouse, 1372

***p*-*p*′-Methylenediacetanilide,** little carcinogenic activity of. Miller, Fletcher, Margreth, and Miller, 1002

***S*-Methyl-2-fluorenethiol.** *See* 2-Methylthiofluorene.

**Methylglyoxal-bis(guanylhydrazone),** toxic and pathologic effects of, in various animals. Mihich, Simpson, and Mulhern, 962

**9-Methyl-6-mercaptopurine-S$^{35}$,** *in vivo* metabolism by the rat. Hansen, Giles, and Nadler, 761

**2′-Methyl-4′-phenylacetanilide.** *See* 3-Methyl-4-acetylaminobiphenyl.

**2-Methylthiofluorene,** little carcinogenic activity of. Miller, Fletcher, Margreth, and Miller, 1002

**Microscopy,** electron. *See* Electron microscopy.

——, fluorescence, of chick embryo cells and Rous virus. Hampton and Eidinoff, 1061

——, *in vivo,* pulmonary response to tumor cell emboli in rabbit. Potter, Buttarazzi, and Cozzarelli, 1202

**Microsomes.** *See also* Cell fractionation.

——, increase in activity, in rat liver, after aminofluorene treatment. Arrhenius and Hultin, 823

**Middleburg,** new virus in tumor-bearing mice. Krulwich, Jacobs, Weisman, and Southam, 322

**Miracil D,** tested on chemically induced mouse tumors and transplants. Homburger, Russfield, Baker, and Tregier, 368

——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

**Mithramycin-Na,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Mitochondria.** *See also* Cell fractionation.

**Mitochondria**—*Continued*
——, oxidative phosphorylation in, of ascites tumor. Sauer, Martin, and Stotz, 632
——, of Novikoff hepatoma, catabolism of serum albumin by. Penn, 388
——, of rat liver, subcellular distribution of metallic cations during carcinogenesis. Bresciani and Auricchio, 1284
——, rat hepatoma, properties of. Emmelot, 38
**Mitochondrial extracts**, of Adenocarcinoma 755, effect of phenolic compounds on electron transport in. Dietrich, 1327
**Mitomycin**, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617
**Mitomycin C**, antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885
——, collagen plate assay for, with KB cells. Renis, Johnson, and Bhuyan, 1126
——, effect on development of sublines of leukemia in rat. Armaghan, 1075
——, inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131
——, Jensen rat sarcoma resistant to. Merker, Reyes, and Anido, 1163
——, tested on chemically induced mouse tumors and transplants. Homburger, Russfield, Baker, and Tregier, 368
——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352
**Mitosis**, activity in rat liver, during DAB carcinogenesis. Daoust, 743
——, experimental and therapeutic modification of, symposium. Biesele, 779
——, frequency, in cultures of white spruce tissue. de Torok and Roderick, 174
——, rates of, of transplantable malignant rat tumors. Bertalanffy and Lau, 627
——, role of folate coenzymes in, *review*. O'Brien, 267
**Miyono adenocarcinoma**, lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850
——, mouse, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167
**Monkey**, benzpyrene hydroxylase activity in duodenum of. Wattenberg, Leong, and Strand, 1120
——, rhesus, urinary metabolites of 2-acetylaminofluorene in. Enomoto, Lotlikar, Miller, and Miller, 1336
**Moore sarcoma No. 1**, rat, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167
**Morris hepatoma**, solid, rat, phosphatides of. Figard and Greenberg, 361
**Morris hepatoma 3683**, rat, catabolism of xanthine and uracil. Wu and Bauer, 1239
——, rat, catalase activity in. Rechcigl, Price, and Morris, 874
——, rat, collagen content of. Gullino, Grantham, and Clark, 1031
**Morris hepatoma 3924A**, catabolism of xanthine and uracil in rats bearing. Wu and Bauer, 1239
——, rat, collagen content of. Gullino, Grantham, and Clark, 1031
**Morris hepatoma 3924C**, rat, hormonal and nutritional effects on uracil incorporation into RNA of. Cantarow, Williams, and Paschkis, 1021
**Morris hepatoma 5123**, anabolism and catabolism of purines by. Wheeler, Alexander, Dodson, Briggs, and Morris, 769
——, catabolism of xanthine and uracil in rats bearing. Wu and Bauer, 1239
——, rat, catalase activity in. Rechcigl, Price, and Morris, 874
——, rat, collagen content of. Gullino, Grantham, and Clark, 1031
**Morris hepatoma 5123A**, feedback inhibition of aspartate transcarbamylase in. Bresnick, 1246
**Morris hepatoma 5123D**, feedback inhibition of aspartate transcarbamylase in. Bresnick, 1246
**MT890 tumor**, ascites, host responses to, in mouse. Siegler and Koprowska, 1278
——, ascites, mechanism of formation, in mouse. Siegler and Koprowska, 1273
**Murphy-Sturm lymphosarcoma**. *See* Lymphosarcoma Murphy-Sturm.
**Muscle**, mouse, enzymatic degradation of azaserine by. Jacquez and Sherman, 56
**Mustards**, cytotoxic alkylating agent, mechanism of action, *review*. Wheeler, 651
**Mycostatin**, required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797
**Myleran**, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**1,2-Naphthoquinone**, antibodies to. Ollodart and Rose, 689
*N*-**2-Naphthylacetamide**. *See* 2-Acetylaminonaphthalene.
**2-Naphthylamine**. *See* 2-Aminonaphthalene.
**Necrosis**, in Walker 256 tumors, experimental study of. Schatten, 286
**Neomycin**, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617
——, required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797
**Neoplasms**. *See* Tumors or specific type of neoplasm.
**Netropsin-sulfate**, antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885
**Neuraminidase**, effect on cellular adhesion and stickiness. Berwick and Coman, 982
**Nickel compounds**, carcinogenicity in rats and mice. Gilman, 158
**Nicotinamide**, effect of stimulation of DPN synthesis by, on RNA, in rat kidney. Revel and Mandel, 456
**Niformyl hydroxyaminoacetate**, activity as antitumor agent. Shigeura and Gordon, 1356
**Nitrogen mustard**. *See* Methylbis(β-chloroethyl)amine.
**Nitrogen mustards**. *See also* specific names, such as Cytoxan, Nitromin.
——, effect on development of sublines of leukemia, rat. Armaghan, 1075
——, mechanism of action, *review*. Wheeler, 651
**Nitromin**, effect on development of sublines of leukemia, rat. Armaghan, 1075
*N*-**Nitrosodialkylamines**, carcinogenic, effect of cysteine on metabolic changes in rat liver produced by. Mizrahi and Emmelot, 339
**Notochord**, tumor-like lesions of, in fish, induction of. Levy, 441
**Novikoff hepatoma**, ascitic, rat, phosphatides of. Figard and Greenberg, 361
——, catabolism of serum albumin by mitochondrial fraction of. Penn, 388
——, catabolism of xanthine and uracil in rats bearing. Wu and Bauer, 1239
——, catalase activity in. Rechcigl, Price, and Morris, 874
——, enzymes involved in glycogen storage in. Nigam, MacDonald, and Cantero, 131
——, feedback inhibition of aspartate transcarbamylase in. Bresnick, 1246
——, rat, collagen content of. Gullino, Grantham, and Clark, 1031
**Novobicin**, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617
**Nuclear protein fraction**, of Walker 256 carcinosarcoma. Busch, Hnilica, Chien, Davis, and Taylor, 637

**Nuclei.** *See also* Cell fractionation.

——, of rat liver, subcellular distribution of metallic cations during carcinogenesis. Bresciani and Auricchio, 1284

**Nucleic acid antagonists,** tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Nucleic acids.** *See also* Ribonucleic acid and Deoxyribonucleic acid.

——, adrenal, effect of Sarcoma 180 and stressing agents on. Hilf, Cowett, Johnson, and Borman, 449

——, metabolism of, in leukemic human leukocytes, *in vitro* incorporation. Williams, 314

——, metabolism of, in rat kidney, effect of nicotinamide on. Revel and Mandel, 456

——, precursor incorporation into, effect of 6-diazo-5-oxo-L-norleucine on. Barclay, Garfinkel, and Phillipps, 809

——, synthesis, effect of deoxyadenosine 1-*N*-oxide on, in ascites tumor cells *in vitro*. Frederiksen and Klenow, 125

——, synthesis in rat liver, carbon incorporation from *p*-dimethylaminoazobenzene. Berenbom, 1343

**Nucleoprotein synthesis,** in folic acid deficiency, *review*. O'Brien, 267

**Nucleoside diphosphokinase,** in glycogen storage in tumors. Nigam, MacDonald, and Cantero, 131

**Nucleotides,** free, effect of ethionine on, in rat liver. Caldarera, Budini, Barbiroli, and Rabbi, 1026

——, hydrolysis of, by Ehrlich ascites tumor cells. Wallach and Ullrey, 228

**Obituary,** J. J. Bittner. Strong, 393

***Ochromonas malhamensis,*** in comparative studies on diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, susceptibility to antitumor antibiotics. Price, Buck, Schlein, and Siminoff, 885

**Oil,** vegetable, effect on carcinogenic activity of 2-acetylaminofluorene. Sugai, Witting, Tsuchiyama, and Kummerow, 510

**Oligomycin,** collagen plate assay for, with KB cells. Renis, Johnson, and Bhuyan, 1126

——, inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

——, inhibitory in broth dilution assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Organ culture,** of human neoplastic tissue, influence of carbon dioxide on. Rovin, 384

**Oriboca,** new virus in tumor-bearing mice. Krulwich, Jacobs, Weisman, and Southam, 322

**Orotic acid-7-$C^{14}$,** decarboxylation of, in treatment of mouse ascites tumors with azauridine. Bruemmer, Holland, and Sheehe, 113

***Oryzia latipes,*** induction of lesions of notochord in. Levy, 441

**Osteogenic sarcoma,** rat, collagen content of. Gullino, Grantham, and Clark, 1031

**Osteogenic sarcoma 344,** rat, inflammatory response to foreign body within. Mahoney and Leighton, 334

**Ovariectomy,** of rats with mammary tumors, purine metabolism in. Wheeler, Alexander, Dodson, and Briggs, 1309

**Ovaries,** hormones of, in mammary cancer induction by polynuclear hydrocarbons. Dao, 973

——, necrosis of corpora lutea, induced by 7,12-dimethylbenzanthracene. Wong, Warner, and Yang, 1053

——, tumor of, human, heterologous growth of, effect on enzymes in rat. Blackwood, Mateyko, and Mandl, 993

**Oxygen,** concentration, effect on carcinogenesis induced by transplacental exposure to urethan, in mice. DiPaolo, 299

——, consumption, of human malignant and normal tissue. Macbeth and Bekesi, 244

——, tension, high, response of virus-induced leukemia in mice to. Libet and Siegel, 737

**Papillomatosis,** bovine, induced immunity of skin, vagina, and urinary bladder to. Olson, Luedke, and Brobst, 463

**Parotid gland tumors,** oncogenic properties of DNA from, in mice. Hays and Carr, 1319

**Penicillin G,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Pentamycin,** inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

**Perfusion,** and isolation, of rat hind limb, technic for. Turner, Tod, Francis, Greenhill, and Couves, 49

**Pharmacology,** of methylglyoxal-bis(guanylhydrazone) in rats, mice, rabbits, and dogs. Mihich, Simpson, and Mulhern, 962

**Phenol,** effect on established cell lines cultivated *in vitro*. Pace and Elliott, 107

**Phenolic compounds,** hydrophobic, effect on electron transport in tumor mitochondrial extracts. Dietrich, 1327

**4′-Phenylacetanilide.** *See* 4-Acetylaminobiphenyl.

**L-Phenylalanine,** required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**Phenylalanines,** ring-substituted, effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

**o-Phenylene diamine HCl,** tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

**2-Phenylphenanthrene-3,2′-dialdehyde,** tritiated, binding to soluble proteins of mouse skin. Abell and Heidelberger, 931

——, tritiated, preparation of. Giovanella, Abell, and Heidelberger, 925

**2-Phenylphenanthrene-3,2′-dicarboxylic acid,** not carcinogenic to mouse skin. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

**Phloretin,** effect on electron transport in tumor mitochondrial extracts. Dietrich, 1327

**Phosphatases,** activity in hamster cheek pouch during experimental carcinogenesis. Mori, Miyaji, Murata, and Nagasuna, 1323

**Phosphatides,** of mouse ascites tumors and rat hepatomas. Figard and Greenberg, 361

——, of mouse skin, during normal and abnormal growth. Carruthers, 294

——, $P^{32}$ uptake by, of liver of tumor-bearing mice. Lee, Salmon, Mosser, and Loken, 1046

**Phosphoglucomutase,** in glycogen storage in tumors. Nigam, MacDonald, and Cantero, 131

**Phosphogluconate dehydrogenase,** changes in, in hamster cheek pouch during carcinogenesis. Scott, Morris, Reiskin, and Pakoskey, 857

**Phosphoglyceraldehyde dehydrogenase,** activity in Sarcoma 180 in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 1230

**Phosphoglyceric acid kinase,** activity in Sarcoma 180 in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 1230

**Phospholipides,** of livers of tumor-bearing mice, uptake of $P^{32}$ by. Lee, Salmon, Mosser, and Loken, 1046

**Phosphorus-$P^{32}$,** uptake by liver phosphatides of tumor-bearing mice. Lee, Salmon, Mosser, and Loken, 1046

**Phosphorylation,** oxidative, in ascites tumor mitochondria. Sauer, Martin, and Stotz, 632

**Pitt 89,** heterotransplanted into hamsters, therapy of. Pierce, Midgley, and Verney, 563

**Pitt 146,** heterotransplanted into hamsters, therapy of. Pierce, Midgley, and Verney, 563

**Pitt 147,** heterotransplanted into hamsters, therapy of. Pierce, Midgley, and Verney, 563

**Pituitary tumors,** in rats and mice, adrenotropic activity of mammosomatotropic tumors. Takemoto, Yokoro, Furth, and Cohen, 917

**Pituitary tumors**—*Continued*
——, thyrotropic, mouse, effect of thyroxine analogs on. Grinberg, Tierney, and Werner, 835
——, thyrotropic, variant with gonadotropic activity. Messier and Furth, 804
**Plant cucurbitacins**, antitumor effect of, on ascites cells. Gallily, Shohat, Kalish, Gitter, and Lavie, 1038
**Plant tissue culture**, chromosome number and mitotic frequency in. de Torok and Roderick, 174
**Plant tumors**, chromosome number and mitotic frequency of cultures of. de Torok and Roderick, 174
**Plasma albumin**, uptake of hydroxyethylated, in rat tissues. Starbuck and Busch, 1206
**Plasma-cell neoplasm 70429**, azaserine resistance in. Anderson and Jacquez, 27
**Plasmacytoma 70429**, mouse, inflammatory response to foreign body within. Mahoney and Leighton, 334
**Plasma glycoproteins**, in various diasease states and cancer. Macbeth and Bekesi, 1170
**Plasma lactic dehydrogenase**, activity, augmenting agent of, distribution and *in vitro* propagation. Yaffe, 573
**Polymixin B**, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617
**Polyoma tumors**, in rats, morphology and frequency of. Kirsten, Anderson, Platz, and Crowell, 484
**Polyoma virus**, induction of mesenchymal tumors in rats by. Kirsten, Anderson, Platz, and Crowell, 484
——, relation to oncogenic properties of DNA from parotid gland tumors, in mice. Hays and Carr, 1319
**Polysaccharide**, in hamster cheek pouch during experimental carcinogenesis. Mori, Miyaji, Murata, and Nagasuna, 1323
**Porfiromycin**, antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885
——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617
**Potassium**, subcellular pattern in liver carcinogenesis, in rat. Bresciani and Auricchio, 1284
**Potassium cyanide**, effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349
**Potassium fluoride**, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131
**Pregnancy**, effect of oxygen concentration on carcinogenesis induced by transplacental exposure to urethan, in mice. DiPaolo, 299
**Presidential address**, value of animal research. Dunn, 898
**Proferrin**, reticuloendothelial stimulation produced by, effect on metastases, in the rat. Fisher and Fisher, 478
**Proteins**, amino acid incorporation into, in rat liver after aminofluorene treatment. Arrhenius and Hultin, 823
——, in interstitial fluid and mouse tumors. Burgess and Sylvén, 581
——, metabolism of rat liver, effects of thioacetamide on. Muramatsu and Busch, 1100
——, nuclear fraction, of Walker 256 carcinosarcoma. Busch, Hnilica, Chien, Davis, and Taylor, 637
——, soluble, tritiated hydrocarbons bound to, of mouse skin. Abell and Heidelberger, 931
——, synthesis in rat livers, and during carcinogenesis or regeneration. Burke, 10
——, synthesis, relation to duplication of DNA in HeLa cells. Mueller, Kajiwara, Stubblefield, and Rueckert, 1084
——, tumor, effects of Cytoxan on, in leukemia L1210. Strozier and Nyhan, 1332
*Proteus vulgaris*, lipopolysaccharide from, together with γ-globulin, effect on tumor growth. Antopol and Chryssanthou, 89
**Protozoa**, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617
——, susceptibility to antitumor antibiotics. Price, Buck, Schlein, and Siminoff, 885
**Psicofuranine**, antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885
——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617
——, with hadacidin, effect on *E. coli*. Shigeura and Gordon, 1356
**Pulmonary**. *See also* Lung.
——, adenomas, in mice, electron microscopy of. Svoboda, 1197
**Purine analogs**, effects on growth of H.Ep. #1 and chick embryo fibroblast cells. Rich, Perez, and Eidinoff, 3
**Purine antagonists**, in chemotherapy in mice. Montgomery, Schabel, and Skipper, 504
**Purines**, anabolism and catabolism of, by hepatomas, in rat. Wheeler, Alexander, Dodson, Briggs, and Morris, 769
——, catabolism of, by regressing tumors. Wheeler, Alexander, Dodson, and Briggs, 1309
——, synthesis, effect of hadacidin on. Shigeura and Gordon, 1356
——, urinary, in leukemia, clinical. Park, Holland, and Jenkins, 469
**Puromycin**, effect on duplication of deoxyribonucleic acid. Mueller, Kajiwara, Stubblefield, and Rueckert, 1084
——, with hadacidin, effect on *E. coli*. Shigeura and Gordon, 1356
**Puromycin-di-HCl**, antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885
**Pyridine nucleotides**, effect of induced synthesis of, *in vivo*, on metabolism of ribonucleic acid. Revel and Mandel, 456
**Pyridoxine-deficient mice**, host defense mechanisms in regression of Sarcoma 180 in. Mihich, 218
**Pyrimidines**, biosynthesis of, feedback inhibition in liver and hepatoma. Bresnick, 1246
——, fluorinated, inhibition of DNA thymine synthesis. Mukherjee and Heidelberger, 815
——, synthesis of, effect of hadacidin on. Shigeura and Gordon, 1356
**Pyruvate kinase**, in glycogen storage in tumors. Nigam, MacDonald, and Cantero, 131

**Rabbit**, benzpyrene hydroxylase activity in duodenum of. Wattenberg, Leong, and Strand, 1120
——, cortisone action in increasing metastases of tumor of. Zeidman, 501
——, differential pulmonary response to tumor cell emboli in. Potter, Buttarazzi, and Cozzarelli, 1202
——, *N*-hydroxylation of 2-acetylaminofluorene in. Irving, 867
——, toxic and pathologic effects of methylglyoxal-bis(guanylhydrazone) in. Mihich, Simpson, and Mulhern, 962
**Radiation**. *See also* Irradiation and X-radiation.
——, atomic, comments on report of United Nations Scientific Committee on effects of. Upton, 1139
**Raromycin**, antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885
**Resistance**, against isotransplantation of lymphomas. Klein, Sjögren, and Klein, 955
——, induced, against Gross lymphoma, cytotoxic and neutralization tests on serum of mice. Slettenmark and Klein, 947
——, induced host, to transplantable mouse glioma. Scheinberg, Levine, Suzuki, and Terry, 67
**Resistant sublines**, of ascites tumor cells, electron microscopy of. Hirono and Kojima, 282
**Respiratory inhibition**, induced in Ehrlich ascites tumor cells by D-glucose and 2-deoxy-D-glucose in. Ibsen, Coe, and McKee, 182
**Reticuloendothelial stimulation**, effect on hepatic metastases, in the rat. Fisher and Fisher, 478

**Reuber H-35 hepatoma,** anabolism and catabolism of purines by. Wheeler, Alexander, Dodson, Briggs, and Morris, 769

**Review,** cancer cell *in vitro*. Paul, 431

——, fluorescent antibodies in cancer research. Glück, 895

——, mechanisms of action of cytotoxic alkylating agents. Wheeler, 651

——, of spontaneous neoplasms in amphibians. Balls, 1142

——, role of folate coenzymes in cellular division. O'Brien, 267

——, significant biochemical effects of hepatocarcinogens in the rat. Reid, 398

——, surface properties of cancer cells. Abercrombie and Ambrose, 525

**Rhabdomyosarcoma,** transplantable metastasizing, in rat. Maddock, Kury, and Riley, 291

**Ribonucleic acid.** *See also* Nucleic acids.

——, effect of induced synthesis of pyridine nucleotides *in vivo* on metabolism of. Revel and Mandel, 456

——, incorporation of aminouracil mustard into, in tissues of tumor-bearing rats. Byvoet and Busch, 249

——, 6-methylaminopurine utilized for synthesis of. Jamison, Huff, and Gordon, 1252

**Ridgway osteogenic sarcoma,** mouse, effect of actinogan on, *in vitro*. Bradner and Sugiura, 167

**Rous sarcoma virus,** and changes in chick embryo cells. Hampton and Eidinoff, 1061

**RP2-L,** nuclear protein fraction of Walker 256 carcinosarcoma. Busch, Hnilica, Chien, Davis, and Taylor, 637

**Sarcolysin.** *See* Melphalan.

**Sarcoma,** human, in tissue culture, morphologic and histochemical features of. Spatz, 914

**Sarcoma 37,** ascites cells, tyrosine transport in. Chirigos, Fanning, and Guroff, 1349

——, ascitic form, effects of uncoupling agents on fatty acid oxidation by. Ellis and Scholefield, 305

——, enzymes involved in glycogen storage in. Nigam, MacDonald, and Cantero, 131

——, solid, mouse, glucose, lactate, and lactic dehydrogenase activity in. Burgess and Sylvén, 581

**Sarcoma 180,** ascites, mouse, phosphatides of. Figard and Greenberg, 361

——, cultured, chromosomal constitution and amethopterin resistance in. Hakala and Ishihara, 987

——, effect of actinogan on, *in vivo*, in mice. Bradner and Sugiura, 167

——, effect of cucurbitacins on. Gallily, Shohat, Kalish, Gitter, and Lavie, 1038

——, effect of 6-diazo-5-oxo-L-norleucine on nucleic acid metabolism in. Barclay, Garfinkel, and Phillipps, 809

——, effect of lipopolysaccharide and γ-globulin on. Antopol and Chryssanthou, 89

——, effect of viruses on, in mice. Krulwich, Jacobs, Weisman, and Southam, 322

——, effect on adrenal nucleic acids, in mice. Hilf, Cowett, Johnson, and Borman, 449

——, glycolysis by, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 1230

——, growth in adrenalectomized mice. Benton, 1220

——, host defense mechanisms in regression of, in pyridoxine-deficient mice. Mihich, 218

——, lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850

——, mouse, effect of azauridine on. Bruemmer, Holland, and Sheehe, 113

——, used in isolation of actinogan, antitumor agent. Schmitz, Bradner, Gourevitch, Heinemann, Price, Lein, and Hooper, 163

**Sarcoma Black,** effect of cucurbitacins on. Gallily, Shohat, Kalish, Gitter, and Lavie, 1038

**Sarcoma MA387,** lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850

——, mouse, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

**Sarcoma T241,** lysozyme in kidney and spleen of mice bearing. Cappuccino, Reilly, and Winston, 850

***Scenedesmus basiliensis,*** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Sensitivity,** collateral, by combination chemotherapy. Paigen, 1290

**Serum,** heterologous, effect on modal distribution of cell variants. Murphy, Bullis, Landau, and Acosta, 906

——, of mice with induced resistance against Gross lymphomas, cytotoxic tests on. Slettenmark and Klein, 947

**Serum albumin,** catabolism of added, by mitochondrial fraction from Novikoff hepatoma. Penn, 388

**Serum globulins,** and bronchogenic carcinoma. Nettleship, 696

**Sindbis,** new virus in tumor-bearing mice. Krulwich, Jacobs, Weisman, and Southam, 322

**Skin,** induced immunity of, to bovine papillomatosis. Olson, Luedke, and Brobst, 463

——, mouse, binding of tritiated hydrocarbons to soluble proteins of. Abell and Heidelberger, 931

——, mouse, carcinogenic activities of various derivatives of dibenzanthracene on. Heidelberger, Baumann, Griesbach, Ghobar, and Vaughan, 78

——, mouse, cocarcinogenic effect of oral griseofulvin to methylcholanthrene-induced cutaneous tumors. Barich, Schwarz, and Barich, 53

——, mouse, fatty acid composition during growth. Carruthers, 294

——, response of epithelium to subcutaneously transplanted tumor, in mouse. Argyris and Argyris, 73

——, survival of skin homografts, in methylcholanthrene-treated mice and mice with spontaneous mammary cancers. Linder, 380

**Sodium,** subcellular pattern in liver carcinogenesis, in rat. Bresciani and Auricchio, 1284

**Sodium arsenate,** tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Sodium azide,** effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

——, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Sodium cyanide,** tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Sodium fluoroacetate,** tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Sodium iodoacetate,** effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

**Sodium malonate,** effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

**Spleen,** elevated lysozyme in extracts of, in tumor-bearing animals. Cappuccino, Reilly, and Winston, 850

——, mouse, enzymatic degradation of azaserine by. Jacquez and Sherman, 56

——, normal, mouse or rat, inflammatory response to foreign body within. Mahoney and Leighton, 334

——, uptake of hydroxyethylated rat albumin by. Starbuck and Busch, 1206

**Spruce,** white, chromosome number and mitotic frequency of cultures of. de Torok and Roderick, 174

**Starvation,** effect on benzpyrene hydroxylase activity in gastrointestinal tract. Wattenberg, Leong, and Strand, 1120

——, effect on uracil incorporation into liver and tumor RNA, rat. Cantarow, Williams, and Paschkis, 1021

**Steroids.** *See also* specific steroids.

——, glucocorticoid activity of, relation to metastasis, in mouse. Albert and Zeidman, 1297

**Stickiness,** cellular, chemical factors in. Berwick and Coman, 982

**Strain.** *See also* under specific name of cell strain, e.g., HeLa.

——, modal distribution of cell variants, of human epithelial cells. Murphy, Bullis, Landau, and Acosta, 906

**Strain B1:I cells,** human, culture of. Norrby, Ericksson, and Mellgren, 147

**Strain B1:II cells,** human, culture of. Norrby, Ericksson, and Mellgren, 147

**Strain C3:I Cells,** human, culture of. Norrby, Eriksson, and Mellgren, 147

**Strain C3:II cells,** human, culture of. Norrby, Eriksson, and Mellgren, 147

**Strain L cells,** effects of acetone and phenol on. Pace and Elliott, 107

**Strain NCTC 1742,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Streptimidone,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Streptomyces,** antitumor agent from, effect on Sarcoma 180 and tumor spectrum. Bradner and Sugiura, 167

——, antitumor agent from, properties of. Schmitz, Bradner, Gourevitch, Heinemann, Price, Lein, and Hooper, 163

**Streptomycin,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Streptonigrin,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Streptovitacin A,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Succinic-cytochrome c reductase,** effect of hydrophobic phenolic compounds on. Dietrich, 1327

**Succinic dehydrogenase,** activity in hamster cheek pouch during experimental carcinogenesis. Mori, Miyaji, Murata, and Nagasuna, 1323

**Sulfadiazine,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Sulfamerazine,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Sulfapyridine,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Sulfathiazole,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Sulfides,** nickel and cobalt, carcinogenicity in rats and mice. Gilman, 158

**Sulfonic esters,** mechanisms of action as cytotoxic alkylating agent, *review*. Wheeler, 651

**Supernatant fraction.** *See* Cell fractionation.

**Supplements,** Cancer Chemotherapy Screening Data XIII. No. 1, Part 2, CS 1

——, Cancer Chemotherapy Screening Data XIV. No. 4, Part 2, CS 157

——, Cancer Chemotherapy Screening Data XV. No. 5, Part 2, CS 363

——, Cancer Chemotherapy Screening Data XVI. No. 7, Part 2, CS 559

——, Cancer Chemotherapy Screening Data XVII. No. 8, Part 2, CS 749

——, Cancer Chemotherapy Screening Data XVIII. No. 11, Part 2, CS 919

**Symposium,** experimental and therapeutic modification of mitosis. Biesele, 779

**TEM.** *See* Triethylenemelamine.

**Terramycin,** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**TESPA.** *See* N,N′,N″-Triethylenethiophosphoramide.

**Testosterone,** effect on spontaneous and methylcholanthrene-induced leukemia in mice. Liebelt and Liebelt, 1180

——, given to rats with mammary tumors, purine metabolism in. Wheeler, Alexander, Dodson, and Briggs, 1309

***Tetrahymena pyriformis,*** in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, susceptibility to antitumor antibiotics. Price, Buck, Schlein, and Siminoff, 885

**Tetramin,** effect on development of sublines of leukemia, rat. Armaghan, 1075

**Tetraphenylporphinesulfonate,** distribution in tumor-bearing rat. Winkelman, 589

**Theories,** of changing cell populations, sensitive and resistant leukemic cells. Friedkin and Goldin, 607

**Thioacetamide,** effects on protein metabolism of rat liver. Muramatsu and Busch, 1100

**6-Thioguanine,** effect on growth of H.Ep. #1 and chick embryo fibroblast cells. Rich, Perez, and Eidinoff, 3

**6-Thioguanosine,** effect on growth of H.Ep. #1 and chick embryo fibroblast cells. Rich, Perez, and Eidinoff, 3

**ThioTEPA.** *See* N,N′,N″-Triethylenethiophosphoramide.

**Thorium dioxide,** colloidal, as carcinogen in rats and mice. Gilman and Ruckerbauer, 152

**Thorotrast.** *See* Thorium dioxide.

**L-Threonine,** required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**Thymidine,** *in vitro* incorporation into human tumor tissue. Wolberg and Brown, 1113

**Thymidine-H³,** autoradiography with, in regenerating rat liver. Grisham, 842

**Thymidylate synthetase,** from tumor lines resistant to 5-fluorouracil. Häggmark, 568

**Thymomas,** epithelioid, induced by DNA from parotid gland tumors, in mice. Hays and Carr, 1319

**Thymus,** in induction of malignant lymphoma by 7,12-dimethylbenz[*a*]anthracene in mice. Rappaport and Baroni, 1067

**Thyrotropic tumors,** mouse, effect of thyroxine analogs on. Grinberg, Tierney, and Werner, 835

——, variant with gonadotropic activity. Messier and Furth, 804

**Thyroxine analogs,** effect on growth and secretion of pituitary thyrotropic tumors. Grinberg, Tierney, and Werner, 835

**Tissue culture,** cancer cell *in vitro, review*. Paul, 431

——, chemicals required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

——, chemotherapeutic agents in diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, collagen plate assay for cytotoxic agents against KB cells. Bhuyan, Renis, and Smith, 1131

——, DNA synthesis in chromosomes of HeLa cells. Stubblefield and Mueller, 1091

——, DNA synthesis in HeLa cells, effect of puromycin. Mueller, Kajiwara, Stubblefield, and Rueckert, 1084

——, effects of acetone and phenol on cell lines *in vitro*. Pace and Elliott, 107

——, human cell strains of malignant and benign origin from same individual. Norrby, Eriksson, and Mellgren, 147

——, induced and spontaneous cell alterations in human cell culture. Ludovici, Ashford, and Miller, 788

——, modal distribution of cell variants of human epithelial cells. Murphy, Bullis, Landau, and Acosta, 906

——, of cells from human tumors, chromosome constitution of. Ishihara, Moore, and Sandberg, 375

——, of chick embryo cells and Rous sarcoma virus. Hampton and Eidinoff, 1061

——, of diploid mammalian cell lines, isolation and long-term culture. Ferguson and Wansbrough, 556

——, of human neoplastic tissue, influence of carbon dioxide on. Rovin, 384

——, of human sarcomas, morphologic and histochemical features of. Spatz, 914

——, of human tumor tissue, uridine and thymidine incorporation into. Wolberg and Brown, 1113

——, of primary explants of human neoplasms, effect of Vincaleukoblastine. Walker and Wright, 1267

——, of Sarcoma 180 cells, chromosomal constitution and amethopterin resistance. Hakala and Ishihara, 987

——, plant, chromosome number and mitotic frequency in. de Torok and Roderick, 174

——, studies on human leukemia and malignant lymphoma. Sykes, Dmochowski, Shullenberger, and Howe, 21

**Tobacco,** cigarette smoke condensate and urethan, carcinogenic effect of. DiPaolo and Sheehe, 1058

**4′-(*p*-Tolyl)acetanilide.** *See* 4′-Methyl-4-acetylaminobiphenyl.

**Toxicity,** differential, enhanced by combination chemotherapy. Paigen, 1290

——, of methylglyoxal-bis(guanylhydrazone) in rats, mice, rabbits, and dogs. Mihich, Simpson, and Mulhern, 962

**Transplantability,** of normal and tumorous cell strains, *review.* Paul, 431

**Transplantation,** heterologous, of choriocarcinoma into hamsters. Pierce, Midgley, and Verney, 563

——, heterologous, of H.Ep. #3 in mice, x-ray diagnostic procedures. Merker and Hurley, 646

——, heterologous, of human adenocarcinoma in hamster cheek pouch. Yohn, Hammon, Atchison, and Casto, 443

——, isologous, of Gross virus-induced lymphomas. Slettenmark and Klein, 947

——, isologous, of lymphomas, resistance against. Klein, Sjögren, and Klein, 955

——, of H.Ep. #3 in newborn Swiss mice. Merker, Bowie, and Anido, 352

——, of hypophyses in mice, and induction of mammary cancer. Boot, Mühlbock, Röpcke, and Tengbergen, 713

——, of Jensen rat sarcoma resistant to mitomycin C. Merker, Reyes, and Anido, 1163

——, of leukemia in rats, effect of chemotherapy on sublines. Armaghan, 1075

——, of malignant rat tumors, mitotic rates during. Bertalanffy and Lau, 627

——, of rat and mouse tumors, collagen content of. Gullino, Grantham, and Clark, 1031

——, of rat leukemia, alterations of characteristics with time. Freedland and Waisman, 701

——, of rat tumors, effect of exercise on growth of tumors. Hoffman, Paschkis, DeBias, Cantarow, and Williams, 597

——, of spontaneous chloroleukemia, in Wistar rat. Schreiner and Will, 757

**Triethylenemelamine,** effect on development of sublines of leukemia in rat. Armaghan, 1075

——, effect on tyrosine transport in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

**N,N′,N″-Triethylenethiophosphoramide,** effect on chemically induced mouse tumors and transplants. Homburger, Russfield, Baker, and Tregier, 368

——, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

——, response of Walker 256 carcinosarcoma to perfusion with, in rat hind limb. Turner, Tod, Francis, Greenhill, and Couves, 49

**2-Trifluoroacetylaminofluorene,** comparative carcinogenicity of, in rat. Miller, Fletcher, Margreth, and Miller, 1002

**2-Trifluoroacetylaminofluoren-9-one,** comparative carcinogenicity of, in rat. Miller, Fletcher, Margreth, and Miller, 1002

**2,2,2-Trifluoro-*N*(fluoren-2-yl)acetamide.** *See* 2-Trifluoroacetylaminofluorene.

**2,2,2-Trifluoro-*N*-(9-oxofluoren-2-yl)acetamide.** *See* 2-Trifluoroacetylaminofluoren-9-one.

**Triiodothyropropionic acid,** effect on pituitary thyrotropic tumors in mouse. Grinberg, Tierney, and Werner, 835

**Triosephosphate isomerase,** activity in Sarcoma 180 in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 1230

**Tris(1-azirdinyl)phosphine sulfide,** effect on development of sublines of leukemia in rat. Armaghan, 1075

**2,4,6-Tris(1-aziridinyl)-*s*-triazine.** *See* Triethylenemelamine.

**Tritium,** carcinogenic hydrocarbons labeled with, bound to mouse skin proteins. Abell and Heidelberger, 931

——, labeling of carcinogenic hydrocarbons with. Giovanella, Abell, and Heidelberger, 925

**Trophoblastic disease,** in women, treated with actinomycin D. Ross, Stolbach, and Hertz, 1015

**Trypsin,** required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**Trypsin inhibitors,** decreased in tumor-bearing animals. Blackwood, Mateyko, and Mandl, 993

**L-Tryptophan,** required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**TSPA.** *See* Tris(1-aziridinyl)phosphine sulfide.

**Tubercidin,** collagen plate assay for, with KB cells. Renis, Johnson, and Bhuyan, 1126

——, inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

**Tumor 4183,** dependent-responsive thyrotropic tumor, effect of thyroxine analogs on. Grinberg, Tierney, and Werner, 835

**Tumor L23,** autonomous nonresponsive thyrotropic tumor, effect of thyroxine analogs on. Grinberg, Tierney, and Werner, 835

**Tumor L24,** autonomous responsive thyrotropic tumor, effect of thyroxine analogs on. Grinberg, Tierney, and Werner, 835

**Tumorigenesis.** *See* Carcinogenesis.

**Tumors,** formation, in various tissues of rat, with urethan. Tannenbaum, Vesselinovitch, Maltoni, and Mitchell, 1362

——, growing and regressing, in rats, purine metabolism compared. Wheeler, Alexander, Dodson, and Briggs, 1309

——, growth, inhibition of Sarcoma 180 by lipopolysaccharide and γ-globulin. Antopol and Chryssanthou, 89

——, human, oxygen consumption and anaerobic glycolysis of. Macbeth and Bekesi, 244

——, mesenchymal, in the rat, induced by polyoma virus. Kirsten, Anderson, Platz, and Crowell, 484

**Turpentine,** effect of adrenal nucleic acids, in mice. Hilf, Cowett, Johnson, and Borman, 449

**Tylosin,** antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**Tyrosine transport,** in Sarcoma 37 ascites cells. Chirigos, Fanning, and Guroff, 1349

**Ultrastructure.** *See* Electron microscopy.

**Uncoupling agents,** effects on fatty acid oxidation by transplantable tumors. Ellis and Scholefield, 305

**United Nations Scientific Committee,** comments on report on effects of atomic radiation. Upton, 1139

**Uracil,** catabolism in tumor-bearing rats. Wu and Bauer, 1239

——, incorporation into liver and tumor RNA in rat. Cantarow, Williams, and Paschkis, 1021

**Uracil reductase**, activity in liver of tumor-bearing rats. Wu and Bauer, 1239

**Urethan**, and cigarette smoke condensate, carcinogenic effect of. DiPaolo and Sheehe, 1058

——, multipotential carcinogen in mice. Tannenbaum and Maltoni, 1105

——, multipotential carcinogenicity of, in rat. Tannenbaum, Vesselinovitch, Maltoni, and Mitchell, 1362

——, tested on H.Ep. #3 tumor in newborn Swiss mice. Merker, Bowie, and Anido, 352

——, transplacental exposure to, effect of oxygen concentration on carcinogenesis induced by, in mice. DiPaolo, 299

**Uridine**, *in vitro* incorporation into human tumor tissue. Wolberg and Brown, 1113

**Uridine kinase**, during development of resistance to 5-fluorouracil. Reichard, Sköld, Klein, Révész, and Magnusson, 235

——, in Ehrlich ascites cells. Sköld, Magnusson, and Révész, 1226

**Uridine phosphorylase**, during development of resistance to 5-fluorouracil. Reichard, Sköld, Klein, Révész, and Magnusson, 235

**Urinary glycoproteins**, in human leukemia. Tunis and Weinfeld, 764

**Urinary metabolites**, of 2-acetylaminofluorene in rhesus monkey. Enomoto, Lotlikar, Miller, and Miller, 1336

**Urinary purines**, in leukemia, in human. Park, Holland, and Jenkins, 469

**Uterine adenocarcinoma 94153**, mouse, inflammatory response to foreign body within. Mahoney and Leighton, 334

**Uterus**, cervix of, growth potentials of precancer of, *in vitro* and in cortisone-treated hamsters. Mellgren, Boeryd, and Hagman, 139

**Vagina**, induced immunity of, to bovine papillomatosis. Olson, Luedke, and Brobst, 463

**Valacidin**, antitumor effect tested on HeLa and protozoan cells. Price, Buck, Schlein, and Siminoff, 885

**L-Valine**, required to induce alterations in human cell culture. Ludovici, Ashford, and Miller, 797

**Vancocin**, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Velban**, in comparative studies of diverse *in vitro* cell systems. Johnson, Simpson, and Cline, 617

**Versenate**, disodium, effect on cellular adhesion and stickiness. Berwick and Coman, 982

**Versene**, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**Vincaleukoblastine**, effect on primary explants of human neoplasms. Walker and Wright, 1267

**Viruses**, Gross, lymphomas induced by, resistance against, in mice. Slettenmark and Klein, 947

——, induction of mesenchymal tumors in rats by polyoma virus. Kirsten, Anderson, Platz, and Crowell, 484

——, leukemia induced by, in mice, response to high oxygen tension. Libet and Siegel, 737

——, particles in electron microscopy of myeloid leukemias in mice. Parsons, Upton, Bender, Jenkins, Nelson, and Johnson, 728

——, Rous sarcoma, and changes in chick embryo cells. Hampton and Eidinoff, 1061

——, six new, in tumor-bearing mice. Krulwich, Jacobs, Weisman, and Southam, 322

**Vitamin analog**, 6-aminonicotinamide, tested in collagen plate assay on KB cells. Bhuyan, Renis, and Smith, 1131

**VX2 carcinoma**, rabbit, *in vivo* microscopy in study of metastasis. Potter, Buttarazzi, and Cozzarelli, 1202

**Wagner osteogenic sarcoma**, mouse, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

**Walker carcinosarcoma 256**, catabolism of xanthine and uracil in rats bearing. Wu and Bauer, 1239

——, collagen content of. Gullino, Grantham, and Clark, 1031

——, distribution of tetraphenylporphinesulfonate in rats bearing. Winkelman, 589

——, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167

——, effect of dietary restriction of folic acid on growth of, in the rat. Rosen and Nichol, 495

——, effect of ethylenephosphoramides on. Crossley, Kuh, and Allison, 549

——, enzymes involved in glycogen storage in. Nigam, MacDonald, and Cantero, 131

——, experimental study of necrosis in. Schatten, 286

——, hormonal and nutritional effects on uracil incorporation into RNA of. Cantarow, Williams, and Paschkis, 1021

——, induced metastases of, in the rat, by Proferrin. Fisher and Fisher, 478

——, influence of exercise on growth of, in rat. Hoffman, Paschkis, DeBias, Cantarow, and Williams, 597

——, intracellular distribution of 5-bis(2-chloroethyl)amino-uracil-2-$C^{14}$ in tissues of rats bearing. Byvoet and Busch, 249

——, lysozyme in kidney and spleen of rats bearing. Cappuccino, Reilly, and Winston, 850

——, mitotic rates of. Bertalanffy and Lau, 627

——, nuclear protein fraction of. Busch, Hnilica, Chien, Davis, and Taylor, 637

——, response to perfusion with triethylenethiophosphoramide, in rat hind limb. Turner, Tod, Francis, Greenhill, and Couves, 49

——, uptake of hydroxyethylated rat albumin by. Starbuck and Busch, 1206

**Xanthine**, catabolism in tumor-bearing rats. Wu and Bauer, 1239

**Xanthine-8-$C^{14}$**, anabolism and catabolism by minced rat tissues. Wheeler, Alexander, Dodson, Briggs, and Morris, 769

**Xanthine oxidase**, activity in liver of tumor-bearing rats. Wu and Bauer, 1239

**Xanthomycin**, inhibitory activity against KB cells in broth and collagen plate assays. Bhuyan, Renis, and Smith, 1131

**X-radiation**. *See also* Irradiation and Radiation.

——, as diagnostic procedure in heterotransplants of H.Ep. #3. Merker and Hurley, 646

**Yoshida ascites sarcoma**, electron microscopy of, and resistant subline. Hirono and Kojima, 282
